### 2.0.1 A Portrait of Samuel Hartlib: In Search of Universal Betterment

Author: Charles Webster

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0486>

The 2013 digitization of the vast Hartlib Papers archive highlighted the pressing need for a comprehensive modern study of Samuel Hartlib (1600–1662), a central figure in seventeenth-century intellectual life. Though educated in Eastern Europe, Hartlib spent his adult life in London, where he became a prolific correspondent and chronicler. His *Ephemerides*, spanning 1634 to 1660, and his extensive correspondence with leading thinkers across Britain and Protestant Europe offer an unparalleled window into the era's religious, political, and scientific ferment.

### 2.0.2 The Intertwined World of the Oral and Written Transmission of Sacred Traditions in the Middle East

Editor: Alba Fedeli

Editor: Geoffrey Khan

Editor: Johan Lundberg

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0498>

In the medieval Middle East, the scriptures of Christianity, Judaism and Islam were transmitted in written and oral form. The means of written transmission and the textualisation of the oral reading of these scriptures exhibit many parallels, which reflect cultural contact and convergence across the various religious communities. This volume is the outcome of a project, funded jointly by the Deutsche Forschungsgemeinschaft and the Arts and Humanities Research Council, that aimed to bring together strands of research related to various aspects of the transmission of these sacred texts in order to reach a deeper understanding of the intertwined world of the three major religions of the Middle East at their formative periods of development during the early Islamic centuries.

### **2.0.3 Allocation, Distribution, and Policy: Notes, Problems, and Solutions in Microeconomics**

<https://doi.org/10.11647/OBP.0466>

This work provides a problem-based and policy oriented approach to teaching microeconomics, development, labor, environment, public economics and topics in business, management and public policy to upper level undergraduates, masters and doctoral students.

### **2.1.1 The Negated Institution: Report from a Psychiatric Hospital**

Editor: Franco Basaglia

Translator: John Foot

Earth, Milky Way: punctum books, 2025

### **2.1.2 Xouth, The Ape: A Tale of Manners**

Author: Iakovos Pitsipios

Translator: Neo G. Christodoulides

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0493>

‘Xouth, the Ape’, published in 1848 by Iakovos Pitsipios is a pioneering and satirical Greek novel that deftly blends humour, cultural critique, and biting social commentary. The novel is set in the aftermath of the Greek War of Independence. The story follows a young Greek man, desperate to present himself as a European aristocrat, who finds himself entangled with Xouth—an ape who is, in fact, a German travel writer transformed as punishment for his vanity and prejudices.

### **2.1.3 Property: Colonial Histories and Messages to the Future**

Author: Ulrike Bergermann

Lüneburg: meson press, 2025

<https://doi.org/10.14619/0689>

To possess something is to lose something: Starting from this seemingly contradictory claim this essay invokes various registers to defamiliarize the ways in which property structures subjectivity, world relations and affects. Intertwined with colonialism, racism and sexism, concepts of property have found an echo in piracy and “postcolonial copyright.” At the level of theory, a crossing out and a reversal of time are required to undo property-related violence and its mindsets. At the level of artistic practice new modes of appropriation become imaginable. And while the commons will not be restored, multiple modes of having and commoning are possible.

### **2.1.4 Performance Research Methods: Interdisciplinary Methods for Theatre, Dance and Performance Studies**

Editor: Liesbeth Groot Nibbelink

Editor: Laura Karreman

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0469>

‘Performance Research Methods’ is the first comprehensive guide to contemporary methodologies in performance studies, offering a clear and structured overview of the tools currently

shaping research in theatre, dance, and performance. While many volumes focus on individual methods, this book uniquely surveys a range of approaches, presenting their historical background, analytical potential, practical application, and interdisciplinary relevance.

### **2.1.5 Ontohackers: Radical Movement Philosophy in the Age of Extinctions and Algorithms, Part III: Metahistories of Movement: Philosophies in Becoming**

Author: Jaym\*/Jaime del Val

Earth, Milky Way: punctum books, 2025

<https://doi.org/10.53288/0545.1.00>

### **2.1.6 Hylo Narrans: Echoes of Material Marronage**

Author: Kevin Toksöz Fairbairn

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0476>

This book explores the acoustic agency of brass as a vital medium through which histories of extraction, resistance, and collective creativity resonate. Blending metalwork, experimental instrument-building, and philosophical inquiry, the book listens closely to brass not just as material, but as storyteller—what the author calls *hylo narrans*, echoing Sylvia Wynter’s invocation of *homo narrans*. Grounded in their practice spanning artisanal craftsmanship and industrial labor, the author examines how materials respond, resist, and reshape meaning within the workshop, the concert hall, and the broader social fabric. By introducing *chimeracords*—hybrid sound objects forged from factory detritus—and their affordance for sonic experimentation, *Hylo Narrans* challenges Western narratives of purity, utility, and control, inviting readers to consider alternative storylines posed by materials-in-flight.

### **2.1.7 Grammar of Etulo: A Niger-Congo (Idomoid) Language**

Author: Chikelu I. Ezenwafor-Afuecheta

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0467>

This work provides the first detailed linguistic description of the grammar of Etulo, a language spoken in Nigeria by a minority group in Benue and Taraba states. This description establishes Etulo as a tone language characterised by a predominant SVO word order, non-inflectional morphology, prominent aspectual values, obligatory complement verbs and verb serialization,

among other features. This grammar also serves as a foundation for further description of the Etulo grammar and for the development of pedagogical materials needed in Etulo language teaching.

### **2.2.1 Imaginary Death**

Author: Mariko Nagai

Earth, Milky Way: punctum books, 2025

<https://doi.org/10.53288/0531.1.00>

### **2.2.2 Sensing Violence: Reading with the Marquis de Sade**

Author: Will McMorran

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0488>

What does reading fictional violence do to us as readers? To find out, this provocative and original book turns to the works of an author synonymous with sexual violence: the Marquis de Sade. Drawing on psychology, cognitive literary studies, and empirical research, it argues that reading is a fundamentally embodied act – and one that implicates us far more than we might like to think in fictional depictions of violence.

### **2.2.3 Representation Theory: A Categorical Approach**

Author: Jan E. Grabowski

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0492>

This volume offers a fresh and modern introduction to one of abstract algebra's key topics. Guiding readers through the transition between structure theory and representation theory, this textbook explores how algebraic objects like groups and rings act as symmetries of other structures. Using the accessible yet powerful language of category theory, the book reimagines standard approaches to topics such as modules and algebras in a way that unlocks modern treatments of more advanced topics such as quiver representations and even representations of Hopf algebras and categories.

### **2.2.4 Questions on the Posterior Analytics (Second Redaction)**

Author: Simon of Faversham

Editor: Iacopo Costa

Editor: Ana María Mora-Márquez

Editor: Gustavo Fernández Walker

Translator: John Longeway

Translator: Matthew Wennemann

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0468>

The commentary edited here, together with the accompanying translation, offers new insight into Simon of Faversham’s philosophy—a fascinating chapter in the history of late medieval thought. It also deepens our understanding of the philosophical discussions on demonstration and related topics that took place during the early period of Europe’s university history, and of the ways in which these discussions drew on earlier philosophical developments in non-European traditions, notably the Islamic philosophical tradition.

### **2.2.5 Careful Village and Other ‘Khashag’ from Tibet: The Amdo Comedies of Menla Jyab**

Author: Menla Jyab

Editor: Timothy Thurston

Editor: Tsering Samdrup

Translator: Timothy Thurston

Translator: Tsering Samdrup

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0452>

This volume offers a unique glimpse into the world of khashag, a vibrant genre of Tibetan spoken comic dialogues from the area Tibetans call Amdo, with the first ever publication of 11 annotated translations of scripts by its leading performer, Menla Jyab. Emerging in the 1980s during a period of cultural revival in Tibetan communities, khashag fused traditional Tibetan expression with influences from Han Chinese *xiangsheng* (crosstalk), evolving into a medium of sharp societal critique and joyous entertainment. Menla Jyab, a pioneering performer, used his platform in radio, television, to craft comedies described as ‘having meaning in every line’.

### **2.2.6 Models in Political Economy: Collective Choice, Voting, Elections, Bargaining, and Rebellion**

Author: Martin J. Osborne

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0490>

This volume explores topics that lie at the core of political economy: collective choice, voting, elections, bargaining, and rebellion. It presents the main formal models used to study the behavior of individuals and groups in political contexts, from choosing public policies and participating as voters and candidates in elections, to staging revolutions. Complete mathematical proofs are provided, to clarify the assumptions and deepen understanding.

Author: Paul Rodrigue

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0474>

At the close of the fourth century CE, Jerome of Stridon—renowned Latin scholar, theologian, and priest—undertook the monumental task of translating the Hebrew-Aramaic Bible into Latin. The result of this effort, now known as the Vulgate, has long been regarded as a foundational text of Western Christianity. In this volume, Paul Rodrigue investigates the sources that Jerome may have drawn upon in the process of translation.

This volume explores how everyday texts in Renaissance Italy engaged with music, sound, and hearing. Of the 358 known editions printed in 1501, only a few contained formal music notation or specialist theory. Yet a surprising wealth of musical knowledge emerges from religious texts, classical commentaries, lifestyle guides, poetry, and more. These sources—rarely penned by professional musicians—reflect the broader cultural presence of music in early 16th-century life, touching on themes like music’s moral influence, its role in education, and its scientific understanding.

Cambridge, UK: Open Book Publishers, 2025

Characters are central to the creation and experience of films and other media. Their cultural significance is profound, but they also raise a wide range of questions. This book provides a comprehensive theory that guides the analysis and interpretation of characters across four dimensions: as represented beings with physical, psychological, and social characteristics; as artefacts with aesthetic structures; as meaningful symbols; and as symptoms of socio-cultural origins and effects. Integrating insights from film, media, and literary studies as well as philosophy, psychology and sociology, the book offers a broad range of approaches for understanding characters and the emotional responses they evoke.

### 2.4.2 The Economics of Cultural Loss: Harm and Resilience in North American Indigenous Communities

Author: Mukesh Eswaran

Foreword by: Ronald L. Trosper

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0477>

Why do North American Indigenous Peoples face such grave conditions in health, poverty, and mortality—including alarmingly high rates of suicide, alcoholism, and drug abuse? In this groundbreaking book, Mukesh Eswaran confronts these urgent questions through the lens of economics, focusing deeply on an underexplored aspect: the erosion of Indigenous culture. While empirical studies have shed some light on Indigenous struggles, Eswaran argues that mainstream economic theory fails to grasp the unique realities of Indigenous communities. His work introduces innovative models that incorporate cultural and communal values—particularly the sacredness of land and the importance of extended family and communal life—as foundational components of Indigenous well-being.

Die Erde befindet sich in einem vom Menschen bewirkten, tiefgreifenden Veränderungsprozess. Um dieses dringliche Problem neu anzugehen, nehmen die Autor\*innen dieses Bandes den Begriff der „Zone“ zum Ausgangspunkt für eine kritische Ökologie. Das „Denken in Zonen“ hält der Makro-Perspektive des Planetarischen den Blick auf das Heterogene und Prozesshafte, auf die Übergänge, Grenzen und Singularitäten von Räumen entgegen. In den Vordergrund rücken damit die Handlungsmacht und Relationalität von Räumen, um die drastischen, ebenso materiellen wie epistemischen Veränderungen und Verschiebungen im Verhältnis des Menschen zur Erde im Anthropozän besser zu fassen. Mit Aufsätzen von Florian Auerochs, Jeanne Etelain, Mary Louise Pratt und Robert Stockhammer versammelt dieser Band erstmals maßgebliche Zugänge zu Begriff und Ästhetik der Zone, die seine Tragweite als Instrument ökologischen Denkens in den Kulturwissenschaften aufzeigen.

### **2.5.3 Gefühle Vermessen: Zur Genealogie des Affective Computing**

Author: Lisa Schreiber

Lüneburg: meson press, 2025

<https://doi.org/10.14619/2287>

Seit Anfang der 2010er Jahre beschäftigt sich das Affective Computing mit der Entwicklung von digitalen Technologien zur automatischen Erfassung menschlicher Gefühle. Das sogenannte emotion detection system operiert auf Grundlage des Facial Action Coding System (FACS), einem Klassifikationssystem für Emotionen, das verspricht, Gefühle anhand der Bewegung der Gesichtsmuskeln zu entschlüsseln. Das FACS transportiert jedoch ein Gefühlssparadigma, das ungelöste Probleme aus der Vorgeschichte der Emotionsforschung bündelt. Gefühle Vermessen untersucht das Nachwirken dieser Probleme in der computergestützten Depressionsforschung

und Autismustherapie, welche die Verfahren des Affective Computing anwenden. Im Zentrum steht die Frage, warum das Codierungssystem trotz dieser Ambivalenzen eine mächtige Produktivität entfaltet.

Therapists endeavour to be non-judgemental and, indeed, are no more qualified to pass judgement on others than anyone else; do they nevertheless learn anything about ethics from their disciplined listening?

The same question was asked after the war about the persecution of the Jews and other minorities, and it's a very live issue again, faced as we are by movements like ISIS, or Putinism in Russia, that cause great suffering in the name of religious or moral regeneration - a bewildering paradox that David Astor, former editor of The Observer called 'the scourge'.

Can psychotherapy throw any light on it, or contribute any ideas as to how we might contain, if not prevent, the barbarism it sanctions? Can it offer any insights into a different, more inclusive kind of ethics, and if so, can we glean any guidance from it as to how we might further it?

These are the questions the author explores, drawing on psychoanalytic thinking on these issues for over a century and illustrated by his work with individuals over four decades.

### 2.9.2 The Making of Les Immatériaux

Author: Andreas Broeckmann

Lüneburg: meson press, 2025

<https://doi.org/10.14619/2591>

The exhibition *Les Immatériaux* was presented at the Centre Pompidou in Paris in 1985. Curated by the philosopher Jean-François Lyotard and design theoretician Thierry Chaput, it is widely regarded as a landmark in the history of postmodern philosophy, as well as for discourses around art, science and digital culture.

Broeckmann's book provides the first comprehensive account of the preparation of this epochal event. It shows how the exhibition resulted from multiple, collaborative and interdisciplinary trajectories in such diverse fields as contemporary art, architecture, science, and network media. Based on extensive archival research, *The Making of Les Immatériaux* offers detailed insights into the curatorial process. Throughout its ten chapters, the book highlights the different forms of cooperation among the people involved in the conception of the exhibition, including Lyotard, Chaput, the team at the Centre de Création Industrielle, and their consultations with artists, theorists, and scientists.

*Les Immatériaux* marks a pivotal point in the history of exhibitions in the 20th century because it gave important impulses for the organisation, design and structure of interdisciplinary exhibitions. Broeckmann discusses the place of *Les Immatériaux* in the broader context of this history, examining the epistemology of exhibits, curatorial agency, and interdisciplinarity in research networks. The book takes up current questions about the relationship between materiality and immateriality, between subjectivity and thinghood, and shows how *Les Immatériaux* continues to offer a significant contribution to debates that over the last decades have become ever more urgent.

In *Bacterial Genomes*, the evolutionary and regulatory processes that shape bacterial life are brought to life. This textbook offers a conceptual exploration of how bacterial genomes are organized, how they evolve, and how their genetic information is interpreted through intricate molecular networks. Drawing on both cutting-edge research and the historical milestones that shaped microbiology, it illuminates how bacteria navigate the intersection of genetic adaptation and ecological resilience.

Editor: Rebecca Lave

Editor: Stuart Lane

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0418>

Despite ongoing debates about its origins, the Anthropocene—a new epoch characterized by significant human impact on the Earth’s geology and ecosystems—is widely acknowledged. Our environment is increasingly a product of interacting biophysical and social forces, shaped by climate change, colonial legacies, gender norms, hydrological processes, and more. Understanding these intricate interactions requires a mixed-methods approach that combines qualitative and quantitative, biophysical and social research.

#### **2.9.6 Two Early Byzantine Bible Manuscripts in Christian Palestinian Aramaic: Codex Climaci Rescriptus II & XI**

Author: Kim Phillips

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0455>

Despite the ubiquitous use of Greek by the Christian church of the late antique Southern Levant, many Christians in the region also—or only—spoke Aramaic. Today, this dialect, known as Christian Palestinian Aramaic (CPA), is relatively sparsely attested in the form of regional inscriptions and, particularly, in the form of vernacular translations of Greek biblical, liturgical and theological texts. These translations survive predominantly as undertexts within palimpsest manuscripts. Codex Climaci Rescriptus (CCR) is one of the most important palimpsest manuscript sources for the recovery of CPA texts.

### **2.9.8 Phenomenography in the 21st Century: A Methodology for Investigating Human Experience of the World**

Author: Gerlese S. Åkerlind

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0431>

Phenomenography offers a distinctive approach to studying human experience of the world, by highlighting different ways in which the same phenomena (concepts, objects, events) are experienced within any group of people. Phenomenography focuses on the relationship between meaning—people’s holistic understanding of phenomena—and structure, that is the part-whole structure of people’s awareness of phenomena. This structure of awareness then forms the basis for identifying differences in the experienced meaning of phenomena, and how awareness needs to change to allow new meanings to emerge—whether educationally, historically, culturally or socially.

## **2.9.10 Harvesting the Sea in Southeastern Arabia: Volume 1: Regional Studies**

Editor: Erik Anonby

Editor: Miranda J. Morris

Editor: Janet C.E. Watson

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0409>

Traditional livelihoods and the ecosystems that sustain them are dying out around the world. This book is a collection of research on the relationships between people, their environment, their expertise and their languages along the ecologically fragile coasts of the Arabian Peninsula.

These studies are the outcome of many years of collaborative fieldwork with local communities in three main regions of southern and eastern Arabia: the Musandam Peninsula, Dhofar and al-Mahrah, and the island of Soqatra. Bringing together oral literature, traditional scientific knowledge, and marine subsistence at the peripheries of the Arabian seaboard, the volume makes a major contribution to the documentation of the indigenous Modern South Arabian languages (MSAL), regional Arabic, and the Kumzari language, as well as to a greater understanding of their speakers' mastery in harvesting the seas.

Editor: Sara Marzagora

Editor: Francesca Orsini

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0405>

The discipline of world literature has traditionally focused on written literatures, particularly the novel, with little emphasis placed on the unwritten verbal arts, despite the significance of oral literary expressions around the world, in the past as in the present. This volume redresses this gap by putting the discipline of world literature into dialogue with scholarship on orature and folklore. It asks, what does world literature look like if we start from orature, from oral texts and utterances, and from the performances and audiences that support it?

### **2.10.9 Being in Shadow and Light: Academics in Post/Conflict Higher Education**

Editor: Dina Zoe Belluigi

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0427>

Academia and its citizens, during periods of political violence and social conflict, are often overlooked. When attention is given, the focus tends to be on student activism, access to higher education, or curriculum development. The experiences of academics affected by conflict remain under-researched, despite the crucial role they play as educators and in generating, documenting, preserving and challenging knowledges. This is particularly concerning given that academics have—and continue to be—at risk as targets of sanction, persecution and oppression.

### **2.11.2 Fragile Evidenz: Videodokumente illegaler Zurückweisungen an Europas Grenzen**

Author: Anna Polze

Lüneburg: meson press, 2024

<https://doi.org/10.14619/2386>

Pushbacks finden systematisch an den EU-Außengrenzen statt. Von offizieller Seite wird ihr Einsatz geheim gehalten oder geleugnet. Fragile Evidenz stellt die Frage, wie aus einem gescheiterten Fluchtversuch eine aussagekräftige Falldarstellung europäischer Grenzregime entstehen kann. Es begreift die Dokumentation illegaler Zurückweisungen als mediale Aushandlungen von Sichtbarkeit und Hörbarkeit, Aufmerksamkeit, öffentlicher Anerkennung und vor allem Evidenz.

Eine zehnminütige Videoinvestigation der Rechercheagentur Forensic Architecture erweist sich als Symptom für die Krisen politischen Auftretens in digitalen Medien. Sie wird detailliert als Montage von Smartphone-Dokumenten fliehender Personen und den Medien forensischer Verifikation aufgeschlüsselt. Im Zentrum steht die Spannung zwischen Fluchtauftritt und

Evidenzprozess, das Wechselspiel von ästhetischen Strategien und rhetorischen Wirksamkeiten, von Situiertheit und Infrastrukturen. Fragile Evidenz ist eine analytische Reaktion auf die anwachsende Präsenz forensischer Medienpraktiken in digitalen Bildkulturen.

Als Nachfolger des früheren Internationalen Jahrbuchs für Medienphilosophie beschäftigt sich das Internationale Jahrbuch für Medienphilosophie und Medienästhetik in der ersten Ausgabe nach dem Relaunch mit der wesentlichen Frage: Was ist Medienästhetik?

Diese Frage steht für eine doppelte Öffnung: Medienästhetik markiert eine Suchbewegung, die die philosophischen wie medienwissenschaftlichen Grundlagen erkundet, die in medienästhetischen Kontexten in Erscheinung treten können. Zugleich lädt sie ein zu einer historischen Kartographierung und begrifflichen Konturierung von Medienästhetik, einer Diskussion ihrer unterschiedlichen Modellierungen und der sich daraus ergebenden Optionen für Kritik.

Ziel ist es, den Begriff Medienästhetik offen zu halten und aus seiner Problematisierung immer wieder neue disziplinübergreifende Debatten anzustoßen. Das Jahrbuch bietet unterschiedlichen Projekten, Positionen und Fragestellungen Raum, die zueinander im Modus des Dissenses, der Überschneidung, der Assoziation, aber auch der inhaltlichen Weiterführung stehen können.

Author: Thorvald Gran

Cape Town: African Minds, 2024

<https://doi.org/10.47622/9781928502869>

ANC land reform started on a good footing with the RDP, but has since moved to a policy of supporting entrepreneurial emerging middle-class black farmers rather than the immiserated rural subsistence farmers. This has shifted government funding and support towards the urban areas leaving rural areas destitute.

In *State Power in Land Reform*, the author relies on a robust theoretical frame, extensive policy analysis and empirical data to advocate for a new engagement with local communities through rejuvenated municipalities, that is, through strong local institutions.

*State Power in Land Reform* provides a valuable analytical account for both the historian and the archive.

Editor: Mehita Iqani

Editor: Wamuwi Mbao

Cape Town: African Minds, 2024

<https://doi.org/10.47622/9781928502920>

What is science communication? This collection proposes that it can be creative writing aimed at the heart, rather than information directed to the mind.

FicSci playfully subverts the term ‘science fiction’ to offer an experimental process that explores the limits of imagination in relation to scientific possibility (and vice versa). FicSci is an experiment in hybridized creative practice that induces new forms of knowledge-making between the hard sciences and the social world. This collection offers writing that emerged from an encounter that brought twelve creative writers together with an astronomer.

The presented science invited contemplation of scientific aspects of the night sky, in specific X-ray binary stars, extra-galactic sources, and magellanic clouds. The creative writings that emerged are attendant to the wider potentialities of scientific thought, and reveal how methodologies for storying the scientific encounter are creatively multi-form.

Author: Erika Kraemer-Mbula

Author: Rebecca Hanlin

Author: Rob Byrne

Author: Chux Daniels

Author: Ann Kingiri

South Africa: African Minds, 2023

<https://doi.org/10.47622/9781928502760>

This book was produced in an environment of uncertainty and constantly changing narratives about COVID-19 and its effects. From a narrative of survival in 2020 to contain the spread of the virus with a central role of government leadership, evidence-informed decisions, solidarity and a scientific race to develop a vaccine taking the central stage; to a later narrative in 2021

focused on socio-economic recovery, building back better, managing vaccine inequalities and visions and proposals for post-COVID societies.

In 2022, we have seen a move to a narrative of post-pandemic (rather than post-COVID-19) and “learning to live with the virus” with societies in the global South learning to navigate the harsh economic realities by looking at opportunities emerging in the digital and regional spaces. The production of this book embeds some of these dominant narratives in different chapters, as they were developed over such unstable ground.

This experience has put a spotlight on the importance of innovative solutions, and the role of public sector, raising a new interest in governance systems and structures, and ways to strengthen governance overall. The pandemic has propelled countries across the world to innovate and develop more resilient systems and strategies that will enable us to gain the capacity to tackle complex challenges we face today and those that will come.

We hope this book helps us extract some valuable lessons from the COVID-19 pandemic. After all, learning from a crisis may well be our best way to prepare for the future.

### **3.10.1 Digital Technology in Capacity Development: Enabling Learning and Supporting Change**

Editor: Joanna Wild

Editor: Femi Nzegwu

Foreword by: Laura Czerniewicz

South Africa: African Minds, 2023

<https://doi.org/10.47622/9781928502708>

This book focuses on digital approaches to capacity development, reflecting the greater interest in how digital tools and platforms can be used for capacity development in the ‘Global South’. While Covid-19 demonstrated some of the benefits of online learning, the widespread, often uncritical adoption of online tools driven by necessity has left many with an experience of ‘emergency online learning’. This book aims to assist in the design of technology-enhanced capacity development by sharing evidence of practices that are principled rather than rushed; inclusive rather than creating new digital divides.

### **3.10.2 Who Counts?: Ghanaian Academic Publishing and Global Science**

Author: David Mills

Author: Abigail Branford

Author: Samuel T. Chatio

Author: Paulina Tindana

South Africa: African Minds, 2023

Since the 1990s, global academic publishing has been transformed by digitisation, consolidation and the rise of the internet. The data produced by commercially owned citation indexes increasingly defines legitimate academic knowledge. Publication in prestigious ‘high impact’ journals can be traded for academic promotion, tenure and job-security. African researchers and publishers labour in the shadows of a global knowledge system dominated by ‘Northern’ journals and by global publishing conglomerates. This book goes beyond the numbers. It tells the story of how the Ghanaian academy is being transformed by this bibliometric economy. It offers a rich account of the voices and perspectives of Ghanaian academics and African journal publishers. How, where and when are Ghana’s researchers disseminating their work, and what do these experiences reveal about an unequal global science system? Is there pressure to publish in ‘reputable’ international journals, what role do supervisors, collaborators and mentors play, and how do academics manage in conditions of scarcity? Putting the insights of more than 40 Ghanaian academics into dialogue with journal editors and publishers from across the continent, the book highlights creative responses, along with the emergence of new regional research ecosystems. This is an important Africa-centred analysis of Anglophone academic publishing on the continent and its relationship to global science.

### **3.11.1 Reframing Africa?: Reflections on Modernity and the Moving Image**

Editor: Cynthia Kros

Editor: Reece Auguiste

Editor: Pervaiz Khan

South Africa: African Minds, 2022

<https://doi.org/10.47622/9781928502678>

This book takes readers on a series of stimulating intellectual journeys from the late nineteenth century to the contemporary era to explore notions of modernity in the production and reception of the African moving image and of African archival practices. Ideas are presented from multiple historical and contemporary perspectives, while inviting new voices to participate in discussions about the future of the African moving image.

*Reframing Africa?* makes a plea for the recognition, preservation and repatriation of the African moving image archive, advancing ideas about how it speaks to contemporary Africans, possessed of the power to elucidate their lived experiences and to reorientate perceptions of the past, present and future. On the basis of this wide-ranging appreciation of the archive, the book charts a way forward for African-inflected film studies as well as other programmes in the humanities and social sciences.

*Reframing Africa?* will appeal to scholars, academics and practitioners across the continent and beyond.

*On Becoming a Scholar: What Every New Academic Needs to Know* Edited by Jonathan Jansen and Daniel Visser

The origins of *On Becoming a Scholar* lie in the realisation that there is a need for a vademecum, a handy compendium of ideas, plans and strategies for building a productive and fulfilling academic career to guide the host of prospective academics.

*On Becoming a Scholar* is geared to help relatively new scholars to construct personal futures and to find their way through the 21st century university. It is intended to be a map, and like any map it does not contain all the contours and details of the landscape, but rather seeks to reveal the important pathways and milestones in the journey to becoming an established academic.

Drawing on highly experienced academics and accomplished professors in their different fields, as well as promising younger academics already on their way, this book covers a concentrated resource of practical wisdom. The topics are broad and, cumulatively, they seek to answer

the many questions that experienced mentors encounter every day in their work with new academics.

Though Graeco-Roman antiquity ('classics') has often been considered the handmaid of colonialism, its various forms have nonetheless endured through many of the continent's decolonising transitions. Southern Africa is no exception. This book canvasses the variety of forms classics has taken in Zimbabwe, Mozambique and especially South Africa, and even the dynamics of transformation itself.

Author: Malve von Möllendorff

Cape Town, South Africa: African Minds, 2022

<https://doi.org/10.47622/9781928502333>

Education is considered key for societies to achieve greater social cohesion and equality. Yet, schools, as the main providers of formal education, have increasingly come into question concerning their role in manifesting and perpetuating social categorisations, inequalities and discrimination instead of decreasing existing fragmentations and challenging power relations and hierarchies.

As a diverse society, Kenya is faced with power struggles and rivalries between different groups – for instance, along ethnic lines, often constructed deep in colonial history. This affects teaching and learning in school and the result is that Kenya is faced with vast disparities in

terms of educational access and success – rendering some social groups marginalised and others favoured.

*Positioning Diversity at Kenyan Schools* explores the ways in which teachers in Kenyan primary and secondary schools experience and deal with social categorisations and diversity in terms of ethnicity, gender, wealth, culture, religion, etc. in their professional practice and in the current education system. Using critical pedagogy and diversity theory as a lens for positioning diversity in Kenyan schools, the questions that this book sets out to answer are: In what ways do the teachers' and schools' practices lead to transformation in terms of more social equality and less discrimination? In what ways do the practices manifest existing group categorisations, hierarchies and discrimination? How can schools and teaching practices in postcolonial Kenya become more inclusive and foster social cohesion and equality?

### **3.14.2 Out of Place: An Autoethnography of Postcolonial Citizenship**

Author: Nuraan Davids

Foreword by: Jonathan D Jansen

Cape Town: African Minds, 2022

<https://doi.org/10.47622/9781928502364>

*Out of Place* offers an in-depth exploration of Nuraan Davids' experience as a Muslim 'coloured' woman, traversing a post-apartheid space. It centres on and explores a number of themes, which include her challenges not only as a South African citizen, and within her faith community, but as an academic citizen at a historically white university. The book is her story, an autoethnography, her reparation.

By embarking on an auto-ethnography, she not only tries to change the way her story has been told by others, transforms her 'sense of what it means to live' (Bhabha, 1994). She is driven by a postcolonial appeal, which insists that if she seeks to imprint her own way of life into the discourses which pervade the world around her, then she can no longer allow herself to be spoken on behalf of or to be subjugated into the hegemonies of others.

The main argument of *Out of Place* is that Muslim, 'coloured' women are subjected to layers of scrutiny and prejudices, which have yet to be confronted. What we know about Muslim 'coloured' women has been shaped by preconceived notions of 'otherness', and attached to a meta-narrative of 'oppression and backwardness'. By centring and using her lived experiences, the author takes readers on a journey of what it is like to be seen in terms of race, gender and religion – not only within the public sphere of her professional identities, but within the private sphere of her faith community.

This volume investigates the uptake of ‘open learning’ in South African Technical Vocational Education and Training (TVET) colleges and higher education institutions. Comprised of 16 studies focused on activities at a range of colleges and universities across the country, these chapters aim to promote a better understanding of open learning practices across the Post-School Education and Training (PSET) sector, including issues such as: recognition of prior learning, access for students with disabilities, work integrated learning, professional development, novel student funding mechanisms, leadership for open educational practices, institutional culture, student support, blended and online learning, flexible learning, online assessment, open educational resource development models and funding, and micro-credentials.

This collection of peer-reviewed chapters contributes to understanding the ways in which South African PSET institutions and educators are interpreting ‘open learning’ as a means of advancing social justice. It includes a historical and contemporary understanding of the economic, cultural and political obstacles facing PSET, drawing on Nancy Fraser’s theory of social justice as ‘participatory parity’ to better understand the ways in which ‘open learning’ may address systemic social injustices in order to allow South African students and educators to thrive.

This volume emerges from research conducted by the Cases on Open Learning (COOL) project, an initiative by the Department of Higher Education and Training in partnership with the Centre for Innovation in Learning and Teaching (CILT) at the University of Cape Town (UCT) in South Africa.

Author: Anja Myrtveit

Democracy and the Discourse of Relevance is set against the backdrop of the spread of neoliberal ideas and reforms since the 1980s, accepting also that these ideas are rooted in a longer history. It focuses on how neoliberalism has worked to transform the university sector and the academic profession. In particular, it examines how understandings of, and control over, what constitutes relevant knowledge have changed.

Taken as a whole, these changes have sought to reorient universities and academics towards economic development in various ways. This includes the installation of strategies for how

institutions and academics achieve recognition and status within the academy, the privatisation of educational services and the downgrading of the value of public higher education, as well as a steady shift away from the public funding for universities. Research universities are increasingly adopting a user- and market-oriented model, with an emphasis on meeting corporate demands, the privileging of short-term research, and a strong tendency to view utility, and the potential to sell intellectual property for profit, as primary criteria for determining the relevance of academic knowledge.

The Voortrekker Monumentality digital archive hosted by Stanford University Libraries is based on the eight-hundred-and-four illustrations from the two-volume book From Memory to Marble: The historical frieze of the Voortrekker Monument. It includes not only images of the monument and the frieze but also many related documents and artworks. The corpus aims to promote studies of controversial monuments, with a focus on visual interpretation.

For the first time the 92-metre frieze of the Voortrekker Monument in Pretoria, one of the largest historical narratives in marble, has been made the subject of a book.

The pictorial narrative of the Boer pioneers who conquered South Africa's interior during the 'Great Trek' (1835-52) represents a crucial period of South Africa's past. Forming the concept of the frieze both reflected on and contributed to the country's socio-political debates in the 1930s and 1940s when it was made. The frieze is unique in that it provides rare evidence of the complex processes followed in creating a major monument.

Based on unpublished documents, drawings and models, these processes are unfolded step by step, from the earliest discussions of the purpose and content of the frieze through all the stages of its design to its shipping to post-war Italy to be copied into marble and final installation in the Monument. The book examines how visual representation transforms historical memory in what it chooses to recount, and the forms in which it depicts this. It also investigates the active role the Monument played in the development of apartheid, and its place in post-apartheid heritage.

This second volume expands on the first, considering each of the 27 scenes in depth, providing new insights into not only the frieze, but also South Africa's history.

Author: Andrew Lilley

Cape Town: African Minds, 2020

<https://doi.org/10.47622/9781928331667>

Bheki Mseleku is widely regarded as one of the most gifted, technically accomplished and emotionally expressive jazz musicians to have emerged from South Africa. His individualistic and eclectic sound draws on American, classical and township influences. He had no apparent formal music training and grew up in a poor village on the outskirts of Durban where, at the fairly late age of seventeen, he discovered that he had an innate ability to play. He has become a key inspiration for aspiring young South African jazz musicians and has left an infinite source of knowledge to draw on.

The Artistry of Bheki Mseleku is an in-depth study of the Mseleku's compositional works and improvisational style. The annotated transcriptions and analysis bring into focus the exquisite skill and artistry that ultimately caught the eye of some of the most celebrated international jazz musicians in the world.

“Despite being entirely self-taught, Mseleku was the most technically sophisticated of jazz musicians, though the abiding experience of hearing him play was one of an unjazzlike simplicity.”

The persistence of indigenous African markets in the context of a hostile or neglectful business and policy environment makes them worthy of analysis. An investigation of Afrocentric business ethics is long overdue. Attempting to understand the actions and efforts of informal traders and artisans from their own points of view, and analysing how they organise and get by, allows for viable approaches to be identified to integrate them into global urban models and cultures.

Tensions in South African universities have traditionally centred around equity (particularly access and affordability), historical legacies (such as apartheid and colonialism), and the shape and structure of the higher education system. What has not received sufficient attention, is the contribution of the university to place-based development.

This volume is the first in South Africa to engage seriously with the place-based developmental role of universities. In the international literature and policy there has been an increasing integration of the university with place-based development, especially in cities. This volume weighs in on the debate by drawing attention to the place-based roles and agency of South African universities in their local towns and cities. It acknowledges that universities were given specific development roles in regions, homelands and towns under apartheid, and comments on why sub-national, place-based development has not been a key theme in post-apartheid, higher education planning.

Education in the Global South faces several key interrelated challenges, for which Open Educational Resources (OER) are seen to be part of the solution. These challenges include: unequal access to education; variable quality of educational resources, teaching, and student performance; and increasing cost and concern about the sustainability of education. The Research on Open Educational Resources for Development (ROER4D) project seeks to build on and contribute to the body of research on how OER can help to improve access, enhance quality and reduce the cost of education in the Global South. This volume examines aspects of educator and student adoption of OER and engagement in Open Educational Practices (OEP) in secondary and tertiary education as well as teacher professional development in 21 countries in South America, Sub-Saharan Africa and South and Southeast Asia. The ROER4D studies and syntheses presented here aim to help inform Open Education advocacy, policy, practice and research in developing countries.

Since the 1990s, internationalisation has become key for institutions wishing to secure funding for higher education and research. Priorities have changed and been influenced by new ways of thinking about universities, and of measuring their impact in relation to each other and to their social goals. Debates are ongoing and hotly contested.

Recent years have witnessed considerable speculation about the potential of open data to bring about wide-scale transformation. The bulk of existing evidence about the impact of open data, however, focuses on high-income countries. Much less is known about open data's role and value in low- and middle-income countries, and more generally about its possible contributions to economic and social development.

Open Data for Developing Economies features in-depth case studies on how open data is having an impact across the developing world—from an agriculture initiative in Colombia to data-driven healthcare projects in Uganda and South Africa to crisis response in Nepal. The analysis built on these case studies aims to create actionable intelligence regarding: (a) the conditions under which open data is most (and least) effective in development, presented in the form of a Periodic Table of Open Data; (b) strategies to maximize the positive contributions of open data to development; and (c) the means for limiting open data's harms on developing countries.

With the adoption of the United Nations Sustainable Development Goals (SDGs) and the Paris Agreement, the purpose of development is being redefined in both social and environmental terms. Despite pushback from conservative forces, change is accelerating in many sectors. To drive this transformation in ways that bring about social, environmental and economic justice at a local, national, regional and global levels, new knowledge and strong cross-regional networks capable of foregrounding different realities, needs and agendas will be essential. In fact, the power of knowledge matters today in ways that humanity has probably never experienced before, placing an emphasis on the roles of research, academics and universities.

Ce rapport est une cartographie exhaustive des commissions électorales dans six pays de la région ouest africaine (Bénin, Cap-Vert, Ghana, Nigeria, Sénégal et Sierra-Léone) dont l'objectif est d'évaluer leur contribution au renforcement de la démocratie participative dans la région. Comme institutions de mise en oeuvre des règles du jeu électoral, les organes de gestion des élections (OGE) ont occupé au cours des deux dernières décennies le centre des discussions et de la pratique sur la question cruciale de la participation effective des citoyens aux affaires publiques de leur pays. Les modes de leur création et les règles de leur fonctionnement effectif n'ont cessé de préoccuper les protagonistes des compétitions électorales et d'occuper le centre des réformes politiques.

L'étude Organes de gestion des élections en Afrique de l'ouest répond donc à un besoin évident d'éclairage sur une institution qui occupe une place de plus en plus centrale dans les processus politiques en Afrique de l'Ouest. Basée sur une recherche documentaire approfondie et des entretiens détaillés menés dans chaque pays, l'étude propose une analyse comparative des OGE qui dégage les ressemblances et dissemblances dans leurs formes comme dans leurs fonctionnements tout en essayant de mettre en exergue les logiques qui fondent leurs succès et leurs limites.

Student Politics in Africa: Representation and Activism By Thierry M Luescher, Manja Klemenčič & James Otieno Jowi

The second volume of the African Higher Education Dynamics Series brings together the research of an international network of higher education scholars with interest in higher education and student politics in Africa. Most authors are early career academics who teach and conduct research in universities across the continent and came together for a research project, and related workshops and a symposium on student representation in African higher education governance.

The book includes theoretical chapters on student organising, student activism and representation; chapters on historical and current developments in student politics in Anglophone and Francophone Africa, and in-depth case studies on student representation and activism in a cross-section of universities and countries.

The book provides a unique resource for academics, university leaders and student affairs professionals as well as student leaders and policy-makers in Africa and elsewhere.

### **3.43.2 Reflections of South African University Leaders: 1981 to 2014**

Editor: Council on Higher Education

Cape Town: African Minds, 2016

<https://doi.org/10.47622/9781928331094>

The inspiration for this collection arose in late 2013 in the Council on Higher Education's (CHE) Monitoring and Evaluation Directorate, the directorate responsible for conducting research on the higher education landscape and monitoring the state of the sector over time. They noted that conditions besetting universities had grown increasingly complex, both globally but more especially locally, and the question arose – how had this altered the challenges to university leadership over the period, say, between the new political dispensation ushered in in 1994 and the second decade of the new millennium? More particularly, how had leaders with a proven track record of visionary and strong leadership during this period faced these challenges? How did they see the main changes that needed dealing with? What challenges did these changes pose and how were they successfully overcome? What did they think, looking back, were the main constituents of successful leadership and management? What wisdom could be distilled for posterity? The Directorate decided to invite a range of vice-chancellors and senior academic leaders who had completed their terms of office to contribute to a project that set out to gather such reflections and compile them into a publication.

Few African countries provide for an explicit right to a nationality. Laws and practices governing citizenship effectively leave hundreds of thousands of people in Africa without a country. These stateless Africans can neither vote nor stand for office; they cannot enrol their children in school, travel freely, or own property; they cannot work for the government; they are exposed to human rights abuses. Statelessness exacerbates and underlies tensions in many regions of the continent. *Citizenship Law in Africa*, a comparative study by two programs of the Open Society Foundations, describes the often arbitrary, discriminatory, and contradictory citizenship laws that exist from state to state and recommends ways that African countries can bring their citizenship laws in line with international rights norms. The report covers topics such as citizenship by descent, citizenship by naturalisation, gender discrimination in citizenship law, dual citizenship, and the right to identity documents and passports. It is essential reading for policymakers, attorneys, and activists.

Worldwide, in Africa and in South Africa, the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the last decade. This heightened attention has not only been concerned with the traditional role of the PhD, namely the provision of a future supply of academics. Rather, it has focused on the increasingly important role that higher education – particularly high-level skills – is perceived to play in national development and the knowledge economy.

Cape Town, South Africa: African Minds, 2015

The educational imagination is the capacity to think critically beyond our located, daily experiences of education. It breaks away from the immediacy of personal understanding by

placing education within wider, deeper and longer contexts. Boundaries of the Educational Imagination develops the educational imagination by answering six questions:

1. What happens when we expand continuously outwards from one school to all the schools of the world?
2. What happens if we go inside a school and explore how its material equipment has changed over the past 300 years?
3. What is the smallest educational unit in our brain and how does it allow an almost infinite expansion of knowledge?
4. What is the highest level of individual development we can teach students to aspire towards?
5. What role does education play in a world that is producing more and more complex knowledge increasingly quickly?
6. How do small knowledge elements combine to produce increasingly complex knowledge forms?

Editor: Felix Maringe

<https://doi.org/10.47622/9780621429152>

Twenty Years of Education Transformation in Gauteng 1994 to 2014: An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994. These essays talk to what a provincial education department does and how and why it does these things – whether it be about policy, resourcing or implementing projects. Each essay is written by one or more specialist in the relevant focus area.

The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader. It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years, both nationally and provincially.

There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm, and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and past. We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years.

The study of the channel allocation problem has received much attention during the last decade. Several techniques such as genetic algorithm, artificial neural network, simulated annealing, tabu search and others have been used. This book is devoted to compiling all the techniques that have been used to solve the channel allocation problem. Each of the methods is described fully in a manner that explains the essential parts of how the techniques are formulated and

applied in solving the problem. This textbook will be helpful to students studying communications or researchers as it compiles all the techniques used since this problem was first solved.

Cape Town: African Minds, 2014

South Africa has made important political strides over the past two decades. It has created a framework of democratic legislative, executive and judicial institutions that mark a clear break from the apartheid past. In theory, they are inclusive and offer every citizen equal access to constitutionally protected rights. Their capacity to deliver, however, is coming under increasing pressure and, as this happens, citizen confidence in their efficacy is waning.

Much of the pressure, which ultimately may affect their legitimacy in the eyes of ordinary citizens, stems from the desperation and sense of economic exclusion experienced by those who find themselves at the wrong end of South Africa's grossly unequal society. If this decline in trust persists, the cohesive effects of the country's democratic institutions will diminish, and instability will become an increasingly common feature of political contestation.

They are linked to national and international developments, as described in the first two papers.

This publication will assist both young and experienced practitioners as they grow into their task of developing the students entrusted to them.

All contributors are South Africans with a great deal of experience in student affairs, and all are committed to the advancement of student affairs in South Africa. The editors are former heads of student affairs portfolios at two leading South African universities.

Driving Change tells a story that exemplifies a basic law of physics, known to all the application of a relatively small lever can shift weight, create movement and initiate change far in excess of its own size.

It tells a story about a particular instance of development co-operation, relatively modest in scope and aim that has nonetheless achieved remarkable things and has been held up as an exemplar of its kind.

It does not tell a story of flawless execution and perfectly achieved outcomes: it is instead a narrative that gives some insight into the structural and organisational arrangements, the institutional and individual commitments, and above all, the work, intelligence and passion of its participants, which made the South Africa Norway Tertiary Education Development (SANTED) Programme a noteworthy success.

This report on the broadcast media in Nigeria finds that liberalisation efforts in the broadcasting sector have only been partially achieved. More than a decade after military rule, the nation still has not managed to enact media legislation that is in line with continental standards, particularly the Declaration on Freedom of Expression in Africa. The report, part of an 11-country survey of broadcast media in Africa, strongly recommends the transformation of the two state broadcasters into a genuine public broadcaster as an independent legal entity with editorial independence and strong safeguards against any interference from the federal government, state governments and other interests.

Hijab: Unveiling Queer Muslim Lives is the first known collection of South African Muslim stories relating to Islam and sexual diversity. This anthology shares real life stories of people

that have struggled, or may still be struggling, to reconcile their spirituality and their sexuality. These are stories that illustrate the oneness of being and reflect on how some interpretations of the scriptures may alienate others. Although the collection focuses predominantly on Muslim stories, it is universal in its approach in dealing with spirituality rather than religion.

Author: Sello Galane

Cape Town: African Minds, 2012

<https://doi.org/10.47622/9781920299286>

South Africa possesses one of the richest popular music traditions in the world – from marabi to mbaqanga, from boeremusiek to bubblegum, from kwela to kwaito. Yet the risk that future generations of South Africans will not know their musical roots is very real. Of all the recordings made here since the 1930s, thousands have been lost for ever, for the powers-that-be never deemed them worthy of preservation. And if one peruses the books that exist on South African popular music, one still finds that their authors have on occasion jumped to conclusions that were not as foregone as they had assumed. Yet the fault lies not with them, rather in the fact that there has been precious little documentation in South Africa of who played what, or who recorded what, with whom, and when. This is true of all music-making in this country, though it is most striking in the musics of the black communities.

Finland, South Korea and the state of North Carolina in the United States are three systems that successfully have harnessed higher education in their economic development initiatives. Common to the success of the all these systems is, amongst others, the link between economic and education planning, quality public schooling, high tertiary participation rates with institutional differentiation, labour market demand, cooperation and networks, and consensus about the importance of higher education for development.

### **3.58.8 Wildland Fire Management Handbook for Sub-Sahara Africa**

Editor: Johann G. Goldammer

Editor: Cornelis de Ronde

Cape Town: African Minds, 2012

<https://doi.org/10.47622/9781928331629>

Fire has been used as a land-use tool for controlling the environment since the early evolution of humanity. Fire continues to be used as such by people living in different ecosystems across sub-Saharan Africa. Consequently, the rich biodiversity of tropical and subtropical savannas, grasslands and fire ecosystems is attributed to the regular occurrence and influence of fire. However, wildfires have been harmful to ecosystems, economies and human security. This is due to increasing population pressure as well as increased vulnerability of agricultural and residential lands.

The Wildland Fire Management Handbook provides scientific guidelines for maintaining and stabilising ecosystems and for state-of-the art fire prevention and control. The handbook features contributors from diverse backgrounds in wildland fire science and fire management. It deals with topics ranging from fire behaviour and controlled burning to fire ecology and the

effects of burning on Cape fynbos. In addition the Wildland Fire Management Handbook includes fire regimes and fire history in West Africa. Thus, the handbook is groundbreaking in its furthering of sub-Saharan Africa's capacity for fire management and consequent preservation of the environment. The Wildland Fire Management Handbook is an important resource for strategic sustainable land-use planning, disaster management and land security. The handbook is well suited to the needs of wildland fire management practitioners, scientists, academics, and students of universities and technical schools. Thus, environmental consultants, conservationists, ecologists and those dealing with wildland fire disaster prevention, preparedness and mitigation will be interested in the book.

Much attention in late-developing countries is given to providing access to studies which allow school leavers to enter science and technology-related careers. These programmes are driven by the belief that graduates will then substantially contribute to the developmental needs of their countries.

But is providing access to institutions enough? Students in developing countries often come from school environments lacking in resources – human, physical and financial. This book, in a number of chapters, reviews research related to the crucial dimension of epistemological access to the disciplines of import, which students need as much as institutional access in order to improve their chances of success.

A significant feature of this collection's research studies is that their empirical bases are highly localised, covering areas such as: research methods; access; curriculum, instruction and assessment; and the relevance of science and mathematics education in Zimbabwe, Uganda, Swaziland, South Africa, Namibia, Malawi, Ghana and Lesotho.

This volume provides invaluable insights and will be of relevance to researchers, policy makers and lecturers interested in these research outcomes in Sub-Saharan Africa. It is the outcome of a doctoral research capacity development project, the Graduate Studies in Science, Mathematics and Technology Education (GRASSMATE).

It is most times not easy for school leavers to make the right choices about the field of academic study that would help them attain their career visions. Factors including family upbringing, social-cultural experiences, early education, peer associations and perception of self all impact on the career choices of young persons.

This book researches and presents a sampling of first-hand accounts of the personal journeys towards the choice of music as a field of specialisation written by students at the Department of Music, University of Pretoria, South Africa. The self-explorations included in the book are insightful glimpses into the individual histories of the students that are worth telling. The varied individual stories are instructive to any young person who wishes to reflect seriously on self and capability before deciding on an appropriate field of higher academic studies.

It is, what in donor circles is known as a ‘South-South-North’ cooperation project which, in this case, involves research cooperation between South Africa, Tanzania and Norway. The first book, entitled Language of instruction in Tanzania and South Africa (LOITASA), focused on the current language in education situation in the two countries by providing a description and analysis of existing language policies and practices.

Editor: Andreas Birckbak

Manchester, UK: Mattering Press, 2022

<https://doi.org/10.28938/9781912729302>

Democratic Situations places the making and doing of democratic politics at the centre of relational research. The book turns the well-known sites of contemporary Euro-American democracy – elections, bureaucracies, public debates and citizen participation – into fluctuating democratic situations where supposedly untouchable democratic ideals are contested and warped in practice. The empirical cases demonstrate that democracy cannot be reduced to theoretical schemes of conflict, institutions or deliberation. Instead, they offer an urgently needed renewal of our understanding of democratic politics at a time when conventional ideas increasingly fail to capture current events such as Brexit, Trump and Covid19.

### **4.3.1 Concealing for Freedom: The Making of Encryption, Secure Messaging and Digital Liberties**

Author: Ksenia Ermoshina

Author: Francesca Musiani

Foreword by: Laura DeNardis

Manchester, UK: Mattering Press, 2022

<https://doi.org/10.28938/9781912729227>

Concealing for Freedom: The Making of Encryption, Secure Messaging and Digital Liberties sets out to explore one of the core battlegrounds of Internet governance: the encryption of online communications. Current debates around encryption have fundamental implications for our individual liberties and collective presence on the Internet. Encryption of communications at scale and in increasingly usable ways has become a matter of public concern, especially since

Edward Snowden's 2013 revelations. A new cryptographic imaginary is taking hold, which sees encryption as a necessary precondition for the formation of networked publics. At the same time, there have been major evolutions and accelerations in the field of secure communications, prompted in part by the cryptography community's renewed efforts to create next-generation secure messaging protocols and applications. The book explores developers' actions and their interactions with other stakeholders, for instance users, security trainers, standardising bodies, and funding organizations. It also examines their interactions with the technical artifacts they develop, in which a core common objective is to create tools that "conceal for freedom" even as how this objective is met differs according to technical architectures, the user publics being targeted and the tools' underlying values and business models.

### **4.4.1 Engineering the Climate: Science, Politics and Visions of Control**

Author: Julia Schubert

Manchester, UK: Mattering Press, 2021

<https://doi.org/10.28938/9781912729265>

Notions of the impending climate crisis have pushed a set of highly contested techno-scientific measures onto policy agendas around the world. Suggestions to deliberately alter, to engineer, the Earth's climate have gained political currency in recent years not as a positive vision of techno-scientific innovation, but as a daunting measure of last resort. The controversial status of various so-called climate engineering proposals raises a simple, yet pressing question: How has it come to this? And, more specifically, how did such contested measures earn their place on policy agendas, despite enormous scientific complexities and fierce political contestation?

### **4.5.1 With Microbes**

Author: Matthäus Rest

Editor: Charlotte Brives

Editor: Salla Sariola

Manchester, UK: Mattering Press, 2021

<https://doi.org/10.28938/9781912729180>

Without microbes, no other forms of life would be possible. But what does it mean to be with microbes? With *Microbes* sets microbes and the multiple ways they exist around, in and on humans at center stage. In this book, 24 social scientists and artists attune to microbes and describe their complicated relationships with humans and other beings. The book shows the multiplicity of these relationships and their dynamism, through detailed ethnographies of the relationships between humans, animals, plants, and microbes. Ethnographic explorations with fermented foods, waste, faecal matter, immunity, antimicrobial resistance, phages, as well as indigenous and scientific understandings of microbes challenge ideas of them being simple entities: not just pathogenic foes, old friends or good fermentation minions, but so much more. By describing these complex, dynamic, and ever-changing entanglements between humans and microbes, the chapters raise crucial points about how microbes are ‘known’ and how social scientists can study microbes with ethnographic methods, more often than not in the absence of microscopes, models, and computations. Following these various entanglements, the book tells how these relations transform both humans and microbes in the process.

## **4.5.2 Environmental Alterities**

Editor: Antonia Walford

Editor: Cristóbal Bonelli

Manchester, UK: Mattering Press, 2021

<https://doi.org/10.28938/9781912729142>

In the context of accelerating environmental crises and exhausted intellectual paradigms, this book asks what comes after ‘after nature’. Instead of demanding new models and approaches, it invites its readers to look to the endpoints and failures of what is already known, in order to generate alternative forms of ethical engagement with worlds both on this planet, and beyond it. Drawing together scholarship from across science and technology studies, philosophy, and anthropology and bringing it into conversation with rich ethnographic and empirical material, the book asks how we might potentialise the contradictions and oppositions of critical social scientific thinking in order to develop a mode of paradoxical engagement that is in constant movement between knowledge and its edges, practices and their limits, and which allows us to relate to that which is excessive to relations and relationality.

### **4.6.1 Sensing In/Security: Sensors as Transnational Security Infrastructures**

Editor: Nina Klimburg-Witjes

Editor: Nikolaus Poechhacker

Editor: Geoffrey C. Bowker

Foreword by: Lucy Suchman

Manchester, UK: Mattering Press, 2021

<https://doi.org/10.28938/9781912729111>

*Sensing In/Security: Sensors as Transnational Security Infrastructures* investigates how sensors and sensing practices enact regimes of security and insecurity. It extends long-standing concerns with infrastructuring to emergent modes of surveillance and control by exploring how digitally networked sensors shape securitisation practices. Contributions in this volume examine how sensing devices gain political and epistemic relevance in various forms of in/security, from border control, regulation, and epidemiological tracking, to aerial surveillance and hacking. Instead of focusing on specific sensory devices and their consequences, this volume explores the complex and sometimes invisible political, cultural and ethical processes of infrastructuring in/security.

Editor: Maria Rentetzi

Editor: Martina Schlünder

Manchester, UK: Mattering Press, 2020

<https://doi.org/10.28938/9781912729012>

A book full of boxes. A box in itself. An unboxing. This book explores boxes in their broadest sense and size. It invites us to step into the field, unravel how and why things are contained and how it might be otherwise. By turning the focus of Science and Technology Studies (STS) to boxing practices, this collation of essays examines boxes as world-making devices.

Author: Bill Gaver

Author: Mike Michael

Author: Liliana Ovalle

Author: Tobie Kerridge

Author: Matthew Plummer-Fernandez

Author: Alex Wilkie

Author: Andy Boucher

Author: Katherine Moline

Manchester, UK: Mattering Press, 2018

<https://doi.org/10.28938/9780995527720>

This is the story of a set of computational devices called Energy Babbles. The product of a collaboration between designers and STS researchers, Energy Babbles are like automated talk radios obsessed with energy. Synthesised voices, punctuated by occasional jingles, recount energy policy announcements, remarks about energy conservation made on social media, information about current energy demand and production, and comments entered by other Babble users.

Developed for members of UK community groups working to promote sustainable energy practices, the Energy Babbles were designed to reflect the complex situations they navigate, to provide information and encourage communication, and to help shed light on their engagements with energy policy and practice. This book tells the story of the Babbles from a mix of design and STS perspectives, suggesting how design may benefit from the perspectives of

STS, and how STS may take an interventionist, design-led approach to the study of emerging technological issues.

### **4.10.2 An Anthropology of Common Ground: Awkward Encounters in Heritage Work**

Author: Nathalia Brichet

Manchester: Mattering Press, 2018

<https://doi.org/10.28938/9780995527799>

Paying attention to details and ‘small stories’ as that which make worlds (heritage projects as well as ethnography), the book proposes a kind of postcolonial scholarship. Rather than uncovering or building up one story about the Danish-Ghanaian past, the work insists on providing ‘inconclusive’ analyses, collaboratively generated in the course of the project work and in the process of writing ethnographically about it. The ambition is to nurture fieldwork as an opportunity for creating a common ground, on which to think about what heritage and ethnography could be. Common ground, then, is not only an ideal of the joint heritage project, but an expression of an anthropological ambition. In consequence, the book is an account of a particular ethnographic research project – the ‘methods story’ being about how post-colonial relations might be noticed and supported and about how empirical research is done as relations between what is going on in the field and the way that the ethnographer chooses to tell the story of the field in the text.

### **4.10.3 Inventing the Social**

Editor: Noortje Marres

Editor: Michael Guggenheim

Editor: Alex Wilkie

Manchester, UK: Mattering Press, 2018

<https://doi.org/10.28938/9780995527768>

*Inventing the Social*, edited by Noortje Marres, Michael Guggenheim and Alex Wilkie, showcases recent efforts to develop new ways of knowing society that combine social research with creative practice. With contributions from leading figures in sociology, architecture, geography, design, anthropology, and digital media, the book provides practical and conceptual pointers on how to move beyond the customary distinctions between knowledge and art, and on how to connect the doing, researching and making of social life in potentially new ways.

Presenting concrete projects with a creative approach to researching social life as well as reflections on the wider contexts from which these projects emerge, this collection shows how collaboration across social science, digital media and the arts opens up timely alternatives to narrow, instrumentalist proposals that seek to engineer behaviour and to design community from scratch. To invent the social is to recognise that social life is always already creative in itself and to take this as a starting point for developing different ways of combining representation and intervention in social life.

### **4.11.1 The Ethnographic Case**

Editor: Emily Yates-Doerr

Editor: Christine Labuski

<https://doi.org/10.28938/995527744>

*The Ethnographic Case* challenges a widespread academic inclination to treat concepts as immutable mobiles. The contributions to this volume develop “ethnographic casing” as a technique of attending to heterogeneities in systems of thought. Medical cases. Legal cases. Briefcases. Detective cases. Some cases featured are violent, others compassionate; some set stereotypes in motion, others break them down. Connected more by difference than similarity, the “cases” in this volume make a case for the virtue of relational science. This is a science that is not beholden to the masters’ narratives, but which embraces the double-work of caring for detail, while caring for the practices through which one learns to care. In 26 gripping and provocative installations, the volume showcases research from numerous influential feminist

and decolonial scholars. Where anthropology has long sought to identify patterns in culture, this volume makes space for inquiry focused on particularities and advocates for an intellectual politics where that which doesn't fit is still allowed to matter.

### **4.12.1 On Curiosity: The Art of Market Seduction**

Author: Frank Cochoy

Manchester, UK: Mattering Press, 2016

<https://doi.org/10.28938/9780995527706>

What draws us towards a shop window display? What drives us to grab a special offer, to enter the privileged circle of premium newspaper subscribers, to peruse the pages of an enticing magazine? Without doubt, it is curiosity — that essential force of everyday action which invites us to break from our habits and to become transported beyond our very selves.

Curiosity (whether healthy or unhealthy) is one of the favourite tricks of market seduction. Capturing a public — attracting the attention of a reader, seducing a customer, meeting the expectations of a user, persuading a voter ... — often requires the construction of a set of technical devices that can play upon people's inner motivations.

Editor: John Law

Editor: Evelyn Ruppert

Manchester, UK: Mattering Press, 2016

<https://doi.org/10.28938/9780993144981>

How might we think differently? This book is an attempt to respond to this question. Its contributors are all interested in non-standard modes of knowing. They are all more or less uneasy with the restrictions or the agendas implied by academic modes of knowing, and they

have chosen to do this by working with, through, or against one important Western alternative — that of the baroque.

#### **4.12.4 Practising Comparison: Logics, Relations, Collaborations**

Editor: Michael Guggenheim

Editor: Joe Deville

Editor: Zuzana Hrdličková

Manchester, UK: Mattering Press, 2016

<https://doi.org/10.28938/9780993144943>

This book compares things, objects, concepts, and ideas. It is also about the practical acts of doing comparison. Comparison is not something that exists in the world, but a particular kind of activity.

Agents of various kinds compare by placing things next to one another, by using software programs and other tools, and by simply looking in certain ways. Comparing like this is an everyday practice. But in the social sciences, comparing often becomes more burdensome, more complex, and more questions are asked of it.

How, then, do social scientists compare? What role do funders, their tools, and databases play in social scientific comparisons? Which sorts of objects do they choose to compare and how do they decide which comparisons are meaningful? Doing comparison in the social sciences, it emerges, is a practice weighed down by a history in which comparison was seen as problematic. As it plays out in the present, this history encounters a range of other agents also involved in doing comparison who may challenge the comparisons of social scientists themselves.

### 6.0.1 Property: Colonial Histories and Messages to the Future

Author: Ulrike Bergermann

Lüneburg: meson press, 2025

<https://doi.org/10.14619/0689>

To possess something is to lose something: Starting from this seemingly contradictory claim this essay invokes various registers to defamiliarize the ways in which property structures subjectivity, world relations and affects. Intertwined with colonialism, racism and sexism, concepts of property have found an echo in piracy and “postcolonial copyright.” At the level of theory, a crossing out and a reversal of time are required to undo property-related violence and its mindsets. At the level of artistic practice new modes of appropriation become imaginable. And while the commons will not be restored, multiple modes of having and commoning are possible.

Die Erde befindet sich in einem vom Menschen bewirkten, tiefgreifenden Veränderungsprozess. Um dieses dringliche Problem neu anzugehen, nehmen die Autor\*innen dieses Bandes den Begriff der „Zone“ zum Ausgangspunkt für eine kritische Ökologie. Das „Denken in Zonen“ hält der Makro-Perspektive des Planetarischen den Blick auf das Heterogene und Prozesshafte, auf die Übergänge, Grenzen und Singularitäten von Räumen entgegen. In den Vordergrund rücken damit die Handlungsmacht und Relationalität von Räumen, um die drastischen, ebenso materiellen wie epistemischen Veränderungen und Verschiebungen im Verhältnis des Menschen zur Erde im Anthropozän besser zu fassen. Mit Aufsätzen von Florian Auerchs, Jeanne Etelain, Mary Louise Pratt und Robert Stockhammer versammelt dieser Band erstmals maßgebliche Zugänge zu Begriff und Ästhetik der Zone, die seine Tragweite als Instrument ökologischen Denkens in den Kulturwissenschaften aufzeigen.

Author: Lisa Schreiber

Lüneburg: meson press, 2025

<https://doi.org/10.14619/2287>

Seit Anfang der 2010er Jahre beschäftigt sich das Affective Computing mit der Entwicklung von digitalen Technologien zur automatischen Erfassung menschlicher Gefühle. Das sogenannte emotion detection operiert auf Grundlage des Facial Action Coding System (FACS), einem Klassifikationssystem für Emotionen, das verspricht, Gefühle anhand der Bewegung der Gesichtsmuskeln zu entschlüsseln. Das FACS transportiert jedoch ein Gefühlsparadigma, das ungelöste Probleme aus der Vorgeschichte der Emotionsforschung bündelt. Gefühle Vermessen untersucht das Nachwirken dieser Probleme in der computergestützten Depressionsforschung und Autismustherapie, welche die Verfahren des Affective Computing anwenden. Im Zentrum steht die Frage, warum das Codierungssystem trotz dieser Ambivalenzen eine mächtige Produktivität entfaltet.

Platforms and the Moving Image offers a multifaceted look at how digital platforms shape and are shaped by economic, cultural, and political forces. The collection examines the effects of gaming, social media, streaming and videosharing platforms on the production, circulation, and consumption of moving images. Through diverse methodologies—archival research, social media ethnography, and textual analysis—the essays investigate the global movements of film and video formats, the platformization of cultural industries, and the evolving nature of media consumption. The volume emphasizes the importance of considering digital labor, media infrastructures, and user practices in understanding platforms’ role in contemporary society.

### 6.2.1 The Making of Les Immatériaux

Author: Andreas Broeckmann

Lüneburg: meson press, 2025

<https://doi.org/10.14619/2591>

The exhibition Les Immatériaux was presented at the Centre Pompidou in Paris in 1985. Curated by the philosopher Jean-François Lyotard and design theoretician Thierry Chaput, it is widely regarded as a landmark in the history of postmodern philosophy, as well as for discourses around art, science and digital culture.

Broeckmann’s book provides the first comprehensive account of the preparation of this epochal event. It shows how the exhibition resulted from multiple, collaborative and interdisciplinary trajectories in such diverse fields as contemporary art, architecture, science, and network media. Based on extensive archival research, The Making of Les Immatériaux offers detailed insights into the curatorial process. Throughout its ten chapters, the book highlights the different forms of cooperation among the people involved in the conception of the exhibition, including Lyotard, Chaput, the team at the Centre de Création Industrielle, and their consultations with artists, theorists, and scientists.

Les Immatériaux marks a pivotal point in the history of exhibitions in the 20th century because it gave important impulses for the organisation, design and structure of interdisciplinary exhibitions. Broeckmann discusses the place of Les Immatériaux in the broader context of this history, examining the epistemology of exhibits, curatorial agency, and interdisciplinarity in research networks. The book takes up current questions about the relationship between

materiality and immateriality, between subjectivity and thinghood, and shows how *Les Immatériaux* continues to offer a significant contribution to debates that over the last decades have become ever more urgent.

### **6.3.2 Fragile Evidenz: Videodokumente illegaler Zurückweisungen an Europas Grenzen**

Author: Anna Polze

Lüneburg: meson press, 2024

<https://doi.org/10.14619/2386>

Pushbacks finden systematisch an den EU-Außengrenzen statt. Von offizieller Seite wird ihr Einsatz geheim gehalten oder geleugnet. Fragile Evidenz stellt die Frage, wie aus einem gescheiterten Fluchtversuch eine aussagekräftige Falldarstellung europäischer Grenzregime entstehen kann. Es begreift die Dokumentation illegaler Zurückweisungen als mediale Aushandlungen von Sichtbarkeit und Hörbarkeit, Aufmerksamkeit, öffentlicher Anerkennung und vor allem Evidenz.

Eine zehnminütige Videoinvestigation der Rechercheagentur Forensic Architecture erweist sich als Symptom für die Krisen politischen Auftretens in digitalen Medien. Sie wird detailliert als Montage von Smartphone-Dokumenten fliehender Personen und den Medien forensischer Verifikation aufgeschlüsselt. Im Zentrum steht die Spannung zwischen Fluchtauftritt und Evidenzprozess, das Wechselspiel von ästhetischen Strategien und rhetorischen Wirksamkeiten, von Situiertheit und Infrastrukturen. Fragile Evidenz ist eine analytische Reaktion auf die anwachsende Präsenz forensischer Medienpraktiken in digitalen Bildkulturen.

Als Nachfolger des früheren Internationalen Jahrbuchs für Medienphilosophie beschäftigt sich das Internationale Jahrbuch für Medienphilosophie und Medienästhetik in der ersten Ausgabe nach dem Relaunch mit der wesentlichen Frage: Was ist Medienästhetik?

Diese Frage steht für eine doppelte Öffnung: Medienästhetik markiert eine Suchbewegung, die die philosophischen wie medienwissenschaftlichen Grundlagen erkundet, die in medienästhetischen Kontexten in Erscheinung treten können. Zugleich lädt sie ein zu einer historischen Kartographierung und begrifflichen Konturierung von Medienästhetik, einer Diskussion ihrer unterschiedlichen Modellierungen und der sich daraus ergebenden Optionen für Kritik.

Ziel ist es, den Begriff Medienästhetik offen zu halten und aus seiner Problematisierung immer wieder neue disziplinübergreifende Debatten anzustoßen. Das Jahrbuch bietet unterschiedlichen Projekten, Positionen und Fragestellungen Raum, die zueinander im Modus des Dissenses, der Überschneidung, der Assoziation, aber auch der inhaltlichen Weiterführung stehen können.

Containers are ubiquitous and inescapable. From handbags to houses, barrels to databases, captivating gameworlds to the “bag of stars” that Ursula Le Guin calls the universe, containers furnish infrastructures for living and action while extending our capacities for managing things across space and time. They not only give shape to our lifeworlds: they form and transform our bodies and being.

The chapters in *Containment: Technologies of Holding, Filtering, Leaking* traverse technologies, bodies, ontologies and imaginaries, reflecting on what different container technologies, containment strategies, and container metaphors tell us about ourselves and how we relate to our worlds. With common reference to Zoë Sofia’s (2000) foundational essay on container technologies, contributors draw on media and cultural studies, social history, architecture, and postdualistic approaches in philosophy and social science to explore liminalities of containment both as and beyond holding.

### **6.5.1 Elementare Ekstasen: Sondierungen der Technosphäre**

Author: Léa Perraudin

Lüneburg: meson press, 2024

<https://doi.org/10.14619/2263>

Elementare Ekstasen überschwemmen, erodieren und evaporieren die wohlsortierten Grenzziehungen zwischen Technik, Umwelt und Mensch. Als Neuverortung im Spannungsfeld medienökologischer, neomaterialistischer und technikfeministischer Theoriebildung werden hier all jene Widerständigkeiten und Un/Verfügbarkeiten sondiert, die von technokapitalistisch protegierten Operationen nicht zu tilgen sind. Was hieße es, die planetarische Implikation der Technosphäre aus Mikroperspektiven zu denken, mit ihren Überlappungen, Leerstellen, Fragmentierungen, Akkumulationen des Technischen zu schreiben? Entlang ihrer materiellen Prozessualität werden elementare Medien wie Regen, Minerale, Staub und Schaum zur Gegenwartsdiagnose. Angesichts der umfassenden Ökologisierungstendenzen und ihrer experimentellen Verarbeitung in Medienkunst und Interfacedesign verdichtet sich ein kritisches Begriffsinventar, das die makrologische Karriere des Technischen anders denkt.

### **6.5.2 Democratic Algorithms: Ethnography of a Public Recommender System**

Author: Nikolaus Poechhacker

Lüneburg: meson press, 2024

Can an algorithm be democratic? And how can we understand algorithms not only as technical, but also as social and political phenomena? *Democratic Algorithms* offers theoretically and empirically informed perspectives on how we can imagine and design algorithms for a democratic society, and what we even mean by that. Based on ethnographic fieldwork, the book illustrates how a recommender system was built in a public broadcaster, raising questions not only about organizational and technical implementation, but also about the possible compatibility of such an algorithmic system with democratic constitutions.

Moving images are increasingly finding their way into laboratories, dentist offices, clinics, airports and gyms. In these places and institutions film and moving image technologies serve to advance knowledge, to show how things are done, to train, teach, educate, mobilize people, as well as to imagine complex social facts and visualize dynamic models and schemes through

data visualizations, pattern recognition software, and in social graphs. But what these moving images do goes beyond instruction, illustration and visual education. This publication introduces the concept of tacit cinematic knowledge to designate a broad variety of epistemic environments in which knowledge is configured in and through cinematic practices, and in the interaction with moving images. The concept thus describes a challenge not only for film and media scholars, but also for social scientists, economists, data analysts and artists.

Covering areas of study beyond the cinema and non-theatrical films which have recently become a focus of inquiry, the contributions analyze the operations of tacit cinematic knowledge in objects ranging from political campaigns, medical and scientific devices, corporate communications, devices for the study of animal behavior and more.

Neural Networks proposes to reconstruct situated practices, social histories, mediating techniques, and ontological assumptions that inform the computational project of the same name. If so-called machine learning comprises a statistical approach to pattern extraction, then neural networks can be defined as a biologically inspired model that relies on probabilistically weighted neuron-like units to identify such patterns. Far from signaling the ultimate convergence of human and machine intelligence, however, neural networks highlight the technologization of neurophysiology that characterizes virtually all strands of neuroscientific and AI research of the past century. Taking this traffic as its starting point, this volume explores how cognition came to be constructed as essentially computational in nature, to the point of underwriting a technologized view of human biology, psychology, and sociability, and how countermovements provide resources for thinking otherwise.

French critic Serge Daney was a central figure in film, television and media criticism of the second half of the twentieth century. He died of AIDS in 1992, just as the concept of queer cinema entered international film studies and just before the start of the digital era that has transformed film culture. This collection of new essays investigates the legacy of Daney's work alongside considerations of feminist, queer and digital cinephilia and contemporary practices of film curation.

Kritische Relationalität interveniert in Ordnungen des Denkens, die Kritik als Operation des Trennens und Auseinanderhaltens entworfen und damit die modernen Dualismen von Menschlichem und Nicht-Menschlichem, Subjekten und Objekten, Organischem und Technischem, Natur und Kultur geprägt haben. Ausgehend von multiplen, verschränkten Krisen suchen die Beiträge dieses Bandes konkrete Szenen auf, in denen das kritische Potenzial von Verbindungen und Verstrickungen anschaulich wird. Das Ausloten von Relationalität wird dabei zu einem

analytischen Modus, der für die Produktivität von Verbindungen sensibilisiert und zugleich ihre differenziellen Dimensionen anerkennt.

Material Trajectories: Designing With Care? turns towards material-driven design processes with the aim of relocating technoscientific trajectories. Concerned with new forms of caretaking, it combines positions from the extended fields of design research and humanities scholarship including practice-based approaches. The contributions explore current ecological conditions through multiple acts of making-with and seek to complicate questions of sustainability, livability, and cooperation. In reassessing the status quo in design and architecture as material practices, they provide outlines for a nuanced reading of these worldmaking processes and ask what different ways of designing with care and complicity might entail.

Der vorliegende Band untersucht systematisch das Verhältnis von digitalen Kameras und ihren softwaretechnischen Grundlagen, die wir unter „Apps“ zusammenfassen. Als konzeptuelles Framing in der Auseinandersetzung mit dieser medialen Verbindung aus Kamera/App wählen wir das ästhetische wie theoretische Spektrum aus Techniken des Appropriierens und Applizierens und damit verbundene Theorietraditionen der Filmwissenschaft sowie der Software, Platform und App Studies. Mit dem programmatischen Befund ‚Deine Kamera ist eine App‘ soll in vier dialogischen Textpaaren dem offenen Themenfeld zwischen Appropriation/Applikation und seiner zeitgenössischen Brisanz wie historischen Tiefe entlang übergreifender Konzepte wie Partizipation, Format und Widerstand nachgegangen werden. Dabei beleuchtet der Band die Verbindung von Ästhetik und Technik, Kunst und Software und wendet sich neben dem Film auch den sogenannten Medienkünsten, dokumentarischen Videoformaten, Selbstdokumentationen und dem Gaming zu.

In the digital media ecology, archives are changing. Artists, curators, critics and scholars assume the role of accidental archivists. They shape cinema's futures by salvaging precarious repositories and making them matter in new ways. In the process, the cinema's public, a democratic body seemingly scattered about platforms and niches in a post-pandemic world, re-emerges as a political force.

Accidental Archivism brings together programmatic statements and proposals to explore an artistic space between archiving and activism, a space where remnants of the past become the building blocks of new ways of making, showing, teaching and thinking cinema.

How are images made, and how should we understand the capacities of digital images? This book investigates images as well as the technologies that host them. Its three chapters discuss the boundaries that images cross and blur between humans, machines, and nature and the ways in which images are political, material, and visual. Exploring these boundaries of images, this book places itself at the limits of the visual and beyond what can be seen, understanding these as starting points for the production of new and radically different ways of knowing about the world and its becomings.

Frictions is a collective invitation to embrace the space of difference that both connects and separates techno-scientific discourses from their actual implementations—or even, from their non-implementations. Through a series of case studies focused on cybernetics, systems research, and some of their more contemporary inheritors, this book argues that such a middle space, the topology of frictions, offers significant insights to assess the historical and epistemological relevance of these interconnected fields. Characterized here as cybernetic thinking, this broad area of theoretical and applied projects would conceal, precisely within its frictions, the operational principles of our present.

Digital Energetics traces the contours of a media analytic of energy and an energy analytic of media across the cultural, environmental, and labor relations they subtend. Focusing specifically on digital operations, its authors analyze how data and energy have jointly modulated the character of data work and politics in a warming world.

What makes information feel true or compelling in our contemporary digital societies? This book brings together different disciplinary understandings of “authenticity” in order to find alternative ways to approach mis- and disinformation that go beyond contemporary fact-checking and its search for the “authentic” truth. Patterned under the algorithmic flows of digital capitalism, authenticity itself is subject to variation, iteration, and outside influence. Linking cross-disciplinary research on the history and practices of algorithmic authenticity points to

new research questions to understand the impact of algorithmic authenticity on social life and its role in contemporary information disorder.

Lüneburg: meson press, 2023

How is human embodiment transformed in an age of algorithms? How do post-cinematic media technologies such as AI, VR, and robotics target and re-shape our bodies? *Post-Cinematic Bodies* grapples with these questions by attending both to mundane devices—such as smartphones, networked exercise machines, and smart watches and other wearables equipped with heartrate sensors—as well as to new media artworks that rework such equipment to reveal to us the ways that our fleshly existences are increasingly up for grabs. Through an equally philosophical and interpretive analysis, the book aims to develop a new aesthetics of embodied experience that is attuned to a new age of predictive technology and metabolic capitalism.

Digitality is imposed upon us! To change this, we should not turn away from it, but look carefully into its transformative power and make operable alternatives such as counter-algorithms and solidarity-oriented commoning. The aim is a world where profit and property no longer exist, but instead where a cooperative dance – between all the needs posed by our ecosystems, and all the needs of people – becomes practicable. This book is a critical media theory of future-building, modulated by a focus on the potentials of counter-dancing as providing ways to unfold fugitive practices.

Die realpolitische Affirmation der Universalität des Digitalen geht mit einer regelrechten Abwehr der kritischen Reflexion seiner scheinbaren Axiome einher. Umso dringlicher ist es zu fragen: Was sind die Bedingungen und Möglichkeiten von Kritik am Digitalen und seiner Kulturen? Wie lässt sich die drängende Notwendigkeit politischer Haltung und kritischer Praxis mit einem wissenschaftlichen Einsatz verbinden, der die Eigengesetzlichkeiten des Digitalen ernst nimmt? Die Beiträge in Kritik postdigital begegnen diesen Herausforderungen aus sozial-, medienwissenschaftlicher und philosophischer Perspektive.

Records of Disasters: Media Infrastructures and Climate Change explores how environmental disasters manifest and inscribe themselves in infrastructures. By turning to infrastructures, their logic and functioning, collapse and malfunction, the volume reveals their potential as fragile material witnesses to and of disasters. As climate change is unequally distributed across continuous dynamics and events, time scales and spatial registers, infrastructures can be understood as proxies or seismographs mediating different spatio-temporal layers that make these dynamics tangible. Disaster is made operational by negotiating what is defined as such, and under which geopolitical conditions. What connects melting glaciers and the knowledge from ice cores to the mapping of the ocean floor and the extraction of resources in the deep-sea? How can infrastructures be thought in time and “critical proximity”, and how do they bear witness to colonial pasts and presents? The volume proposes an analytical perspective on infrastructures as multi-layered witnesses to climate change, bringing together scientific and artistic approaches, students and scholars from different disciplines.

Author: Rebecca Boguska

Lüneburg: meson press, 2022

<https://doi.org/10.14619/2065>

For the last twenty years, the Guantánamo Bay detention camp has not just been a military prison and security facility, but also a site of media production. Films, photographs, and documents have continued to emerge from the camp and become the focus of fierce legal and political battles, as well as intense moral anguish. This book looks at how the US Department of Defense has struggled, and often failed, to control the public perception of these media objects through complex, layered framing devices. It traces how small ruptures in the Department’s framings have provided openings for critical interventions from various fields – ranging

from journalism and human rights law to the arts. Guantánamo Frames thus lays the groundwork for a critical reappraisal of the entanglement of media, violence, and the security state in a broader sense.

Das Fahrrad ist ein Medium sozialer Veränderung. Seine vielfältigen utopischen Potenziale ergeben sich nicht zuletzt aus seinen ebenso vielfältigen und häufig übersehenen medialen Qualitäten: Es vermittelt, es verbindet, es übersetzt; es modifiziert Wahrnehmung und Organisation von Raum und Zeit, von Körpern und von Sozialität. Umgekehrt kann auch das medienwissenschaftliche Denken fahrradmedial verändert werden. Das Fahrrad ist nicht nur Medium des sozialen und ökologischen Wandels: Radfahren eröffnet Perspektiven, verändert Räume, lässt neue Relationen entstehen und teilt Handlungsmacht neu auf.

Fahrradutopien denkt vom Fahrrad aus und ergänzt dabei bestehende Ansätze zur Mobilitätsforschung um medienkulturwissenschaftliche Perspektiven. Die Beiträge verbinden Medienwissenschaften und Forschungen zu Fahrradaktivismus mit der Liebe zum Radfahren. Fokussiert werden Fahrradfilme und -vlogs, Verkehr und Infrastrukturen, Virtuelle Realität und Fahrrad, Fahrradkollektive und Fahrradfeminismus.

Author: Henning Schmidgen

Author: Bernhard J. Dotzler

Lüneburg: meson press, 2022

<https://doi.org/10.14619/1983>

Mitte der 1960er Jahre hat Michel Foucault die Methode der „Diskursanalyse“ in die Geistes- und Sozialwissenschaften eingeführt. Besonders in der Archäologie des Wissens hat er dafür plädiert, die Geschichte des Wissens und der Wissenschaften zum Gegenstand diskursanalytischer Untersuchungen zu machen. Über ein halbes Jahrhundert später ist im Bereich der Informatik ein zunehmendes Interesse an der Diskursanalyse zu verzeichnen. In der Regel spielt Foucault dabei aber keine Rolle. Fern von jeder Archäologie setzen auch die Digital Humanities vermehrt auf die Analyse von historischen und gegenwärtigen Diskursen. Angesichts dieser Konjunkturen ist es an der Zeit, die Archäologie des Wissens neu zu lesen. Denn schon 1968 behauptete der französische Historiker Emmanuel Le Roy Ladurie „Der zukünftige Historiker wird Programmierer sein, oder er wird nicht sein.“ Ein Jahr später gibt Foucault mit seinem Buch auf eben diese Herausforderung eine ebenso informierte wie nuancierte Antwort. Diese Antwort ist in ihrer Aktualität und Relevanz erst noch zu entdecken.

With its diversity of possible Umwelten or environments for living things, Jakob von Uexküll's Umwelt theory has been hailed by many readers as the first step toward an innovative, pluralistic conception of nonhuman life. But what is generally ignored is its structural conservatism, its identitarian logic in which everything should remain in its place and nothing should mix, and its proximity to Nazi ideology and politics. By turning the spotlight on these neglected aspects, Uexküll's Surroundings opens up a new perspective on Uexküll's Umwelt theory.

Die Lehre Jakob von Uexkülls wird oft mit anerkennendem Blick auf die Vielfalt möglicher Umwelten und als erster Schritt zu einem anderen, pluralen Nachdenken über nicht-menschliche Lebensformen gelesen. Ihr struktureller Konservatismus, ihre identitäre Logik, nach welcher alles an seinem Platz bleiben und sich nichts vermischen soll, und ihre Nähe zum Nationalsozialismus bleiben dabei in aller Regel außen vor. With anchors in feminist theory, queer discourse, and digital politics, *Really Fake* rescues “fakeness” from the morass of “fake news” and rejuvenates “fake” as a material and tactical reality. This book treats fakeness as a media object itself: “Fakes” are things that travel and circulate through our bodies, sociality, and the technologies that envelop them. Punctuated with anecdotes, experiences, poetry, stories, and a strong feminist ethic and ethos of care, intimacy, and collectivity, *Really Fake* offers a series of entry points into reframing the debates of fakeness beyond polarized positions of performative outrage.

Lüneburg: meson press, 2021

How do artistic experiments with artificial intelligence problematize human-centered notions of creative agency, authorship, and ownership? Offering a wide-ranging discussion of contemporary digital art practices, philosophical and technical considerations of AI, posthumanist thought, and emerging issues of intellectual property and the commons, this book is firmly positioned against the anthropomorphic spectacle of “creative AI.” It proposes instead the concept of the posthumanist agential assemblage, and invites readers to consider what new

types of creative practice, what reconfigurations of the author function, and what critical interventions become possible when AI art provokes tactical entanglements between aesthetics, law, and capital.

How do we think beyond the dominant images and imaginaries of connectivity? Undoing Networks enables a different connectivity: “digital detox” is a luxury for stressed urbanites wishing to lead a mindful life. Self-help books advocate “digital minimalism” to recover authentic experiences of the offline. Artists envision a world without the internet. Activists mobilize against the expansion of the 5G network.

If connectivity brought us virtual communities, information superhighways, and participatory culture, disconnection comes with privacy tools, Faraday shields, and figures of the shy. This book explores non-usage and the “right to disconnect” from work and from the excessive demands of digital capitalism.

Author: Wanda Strauven

Lüneburg: meson press, 2021

<https://doi.org/10.14619/1860>

The touchscreen belongs to a century-long history of hands-on media practices and touchable art objects. This media-archaeological excavation examines the nature of our sensual involvement with media and invites the reader to think about the touchscreen beyond its technological implications. In six chapters, the book questions and historicizes both aspects of the touchscreen, considering “touch” as a media practice and “screen” as a touchable object.

Earth and Beyond in Tumultuous Times offers a critical exploration of the Anthropocene concept. It addresses the urgent geopolitical and environmental questions raised by the new geological epoch. How are we to rethink landscapes, such as river deltas, oceans, or outer space? How can we create spaces for resistance and utopic dreaming? This volume confronts these questions by charting how space and place are constructed, deconstructed, and negotiated by humans and non-humans under conditions of globally entangled consumption, movement, and contamination. The essays in this volume are complemented by artistic interventions that offer a poetics for a harmed planet and the numerous worlds it contains.

Earth and Beyond in Tumultuous Times is part of the series Future Ecologies dedicated to rethink the multiple ecologies that flourish and struggle on Earth and beyond.

### 6.27.2 Aesthetic Experience of Metabolic Processes

Author: Desiree Förster

Lüneburg: meson press, 2021

<https://doi.org/10.14619/1808>

Simultaneously speculative and inspired by everyday experiences, this volume develops an aesthetics of metabolism that offers a new perspective on the human-environment relation, one that is processual, relational, and not dependent on conscious thought. In art installations, design prototypes, and research-creation projects that utilize air, light, or temperature to impact subjective experience the author finds aesthetic milieus that shift our awareness to the

role of different sense modalities in aesthetic experience. Metabolic and atmospheric processes allow for an aesthetics besides and beyond the usually dominant visual sense.

Aesthetic Experience of Metabolic Processes is part of the series Future Ecologies dedicated to rethink the multiple ecologies that flourish and struggle on Earth and beyond.

With its unprecedented scale and consequences the COVID-19 pandemic has generated a variety of new configurations of media. Responding to demands for information, synchronization, regulation, and containment, these “pandemic media” reorder social interactions, spaces, and temporalities, thus contributing to a reconfiguration of media technologies and the cultures and politics with which they are entangled. Highlighting media’s adaptability, malleability, and scalability under the conditions of a pandemic, the contributions to this volume track and analyze how media emerge, operate, and change in response to the global crisis and provide elements toward an understanding of the post-pandemic world to come.

„If you don't like my arguments, I've got some more.“ (Marshall McLuhan) Wie aber steht es um den Klassiker der Medienwissenschaften im 21. Jahrhundert? Diese Frage diskutieren 37 zeitgenössische Medienwissenschaftler\_innen. Ihre Antworten stehen in einem reizvollen Kontrast zu Interviews, die 2007 entstanden und jetzt online zugänglich gemacht worden sind. Viele der ursprünglich Befragten sind erneut beteiligt, neue Stimmen kamen hinzu. Dabei zeigt sich im Vergleich: Die Medienwissenschaften sind diverser geworden, und manche Zukunftserwartung wurde drastisch revidiert.

Digitalbildliche Hochauflösung ist hier ein Potenzial, das es ermöglicht, mit und an Bildern Wirklichkeit zu erforschen und zu befragen. Dokumentarfilme, Videokunstarbeiten, Galaxiefotografien, Blockbuster, Pressebilder und Netflix-Serien bestellen diese visuelle Kultur in HD und zeigen auf, dass Bilder und Wirklichkeit nicht in fixierten Rahmen sitzen, sondern im Prozess werden.

The Affective Turn has lost its former innocence and euphoria. Affect Studies and its adjacent disciplines have now to prove that they can cope with the return of the affective real that technology, economy, and politics entail.

Two seemingly contradictory developments serve as starting points for this volume. First, technological innovations such as affective computing, mood tracking, sentiment analysis, and social robotics all share a focus on the recognition and modulation of human affectivity. Affect gets measured, calculated, controlled. Secondly, recent developments in politics, social media usage, and right-wing journalism have contributed to a conspicuous rise of hate speech, cybermobbing, public shaming, “felt truths,” and resentful populisms. In a very specific way, politics as well as power have become affective.

Affect gets mobilized, fomented, unleashed. When the ways we deal with our affectivity get unsettled in such a dramatic fashion, we have to rethink our ethical, aesthetical, political as well as legal regimes of affect organization.

The mediality of transmission and the materiality of communication result today more than ever in “acting at a distance” – an action whose agency lies in a medium. This book provides an overview into this crucial phenomenon, thereby introducing urgent questions of human interaction, the binding and breaking of time and space, and the entanglement of the material and the immaterial. Three vivid inquiries deal with histories and theories of mediality and materiality.

From TIFF files to TED talks, from book sizes to blues stations—the term “format” circulates in a staggering array of contexts and applies to entirely dissimilar objects and practices. How can such a pliable notion meaningfully function as an instrument of classification in so many industries and scientific communities? Comprising a wide range of case studies on the standards, practices, and politics of formats from scholars of photography, film, radio, television, and the Internet, *Format Matters* charts the many ways in which formats shape and are shaped by past and present media cultures. This volume represents the first sustained collaborative effort to advance the emerging field of format studies.

Author: Benoît Turquety

Lüneburg: meson press, 2019

In contrast with media constructed as vast, ontologically homogeneous, non-localized systems, formats show material networks of interoperability and exclusions, inscribed in local specificities, and involving precise conditions for the circulation of images and sounds. Formats, institutionalized as standards, frame the “technical networks” defined by Gilbert Simondon, that unfold technical objects into economically and politically structured webs that cover the world. Media are always formatted and, as such, do not flow: they are displaced.

Digital media technologies re-pose the question of organization—and thus of power and domination, control and surveillance, disruption and emancipation. How can we think, explore, critique—and perhaps alter—the organizational bodies and scripts that shape contemporary life?

### 6.34.1 Tracks from the Crypt

Author: John Mowitt

Introduction by: Vinzenz Hediger

Introduction by: Rebecca Boguska

Lüneburg: meson press, 2019

<https://doi.org/10.14619/0030>

David Bowie's 2015 *Blackstar* has been understood by critics and fans alike to have a certain valedictory status. For them, perhaps for us, it is a 39-minute and 13-second farewell. A long goodbye. My angle is different. By situating the Bowie/Renck collaboration on "Lazarus" in the context of a meditation on the question once posed by Georg Stanitzek, "Was ist Kommunikation?" I consider the CD and the video as experiments in re-configuration. More specifically, by thinking about the distinctly cinematic iteration of the question of communication (citing here Captain's "what we have here is ... failure to communicate" from *Cool Hand Luke*) I propose that mediated communication embodies the Ich/Es modality of dialogue disparaged by Martin Buber. What this invites us to consider is whether "Lazarus" in particular isn't

the generation of an audiovisual tombeau from which or out of which communication strains are to be heard. Is it “saying” farewell? Is it “saying” anything? By drawing on Jacques Derrida’s appropriation of the crypt in the work of Abraham and Torok, I propose that “Lazarus” manages (and the feat is neither small nor insignificant) to communicate nothing. In effect, “Lazarus” is the very sound, not of a failure to communicate, but of a “speaking” emptied of what protects it from mediation. Here, Bowie’s gnomic persona assumes a political valence not typically ascribed to it.

Author: Niels-Oliver Walkowski

Lüneburg: meson press, 2019

<https://doi.org/10.14619/1600>

In the wake of the so-called digital revolution numerous attempts have been made to rethink and redesign what scholarly publications can or should be. *Beyond the Flow* examines the technologies as well as narratives driving this unfolding transformation. By unpacking the confusion, heterogeneity and uncertainty that is surrounding scholarly publishing today the book asks for how a sustainable post-digital publishing ecology can be imagined.

This book sets out to show how expanded archival practices can challenge contemporary conceptions and inform the redistribution of power and resources. Calling for the necessity to reimagine the potentials of archives in practice, the three contributions ask: Can archives fulfill their paradoxical potential as utopian sites in which the analog and the digital, the past and future, and remembrance and forgetting commingle?

In a world undergoing constant media-driven change, the infrastructures, materialities, and temporalities of remains have become urgent. Author: Armin Beverungen

Author: Philip Mirowski

Author: Edward Nik-Khah

Author: Jens Schröter

Lüneburg: meson press, 2019

<https://doi.org/10.14619/1471>

Markets abound in media—but a media theory of markets is still emerging. Anthropology offers media archaeologies of markets, and the sociology of markets and finance unravels how contemporary financial markets have witnessed a media technological arms race. Building on such work, this volume brings together key thinkers of economic studies with German media theory, describes the central role of the media specificity of markets in new detail and inflects them in three distinct ways. Nik-Khah and Mirowski show how the denigration of human cognition and the concomitant faith in computation prevalent in contemporary market-design practices rely on neoliberal conceptions of information in markets. Schröter confronts the asymmetries and abstractions that characterize money as a medium and explores the absence of money in media. Beverungen situates these inflections and gathers further elements for

a politically and historically attuned media theory of markets concerned with contemporary phenomena such as high-frequency trading and cryptocurrencies.

### **6.37.2 Communication**

Author: Paula Bialski

Author: Finn Brunton

Author: Mercedes Bunz

Lüneburg: meson press, 2019

<https://doi.org/10.14619/1464>

Contemporary communication puts us not only in conversation with one another but also with our machinery. Machine communication—to communicate not just via but also with machines—is therefore the focus of this volume. Diving into digital communications history, Finn Brunton brings to the fore the alienness of computational communication by looking at network timekeeping, automated trolling, and early attempts at communication with extraterrestrial life. Picking up this fascination with inhuman communication, Mercedes Bunz then performs a close reading of interaction design and interfaces to show how technology addresses humans (as very young children). Finally, Paula Bialski shares her findings from a field study of software development, analyzing the communicative forms that occur when code is written by separate people. Today, communication unfolds merely between two or more conscious entities but often includes an invisible third party. Inspired by this drastic shift, this volume uncovers new meanings of what it means “to communicate.”

### 6.38.1 Ferocious Logics: Unmaking the Algorithm

Author: Luke Munn

Lüneburg: meson press, 2018

<https://doi.org/10.14619/1402>

Contemporary power manifests in the algorithmic. And yet this power seems incomprehensible: understood as code, it becomes apolitical; understood as a totality, it becomes overwhelming. This book takes an alternate approach, using it to unravel the operations of Uber and Palantir, Airbnb and Amazon Alexa. Moving off the whiteboard and into the world, the algorithmic must negotiate with frictions—the ‘merely’ technical routines of distributing data and running tasks coming together into broader social forces that shape subjectivities, steer bodies, and calibrate relationships. Driven by the imperatives of capital, the algorithmic exhausts subjects and spaces, a double move seeking to both exhaustively apprehend them and exhaust away their productivities. But these on-the-ground encounters also reveal that force is never guaranteed. The irreducibility of the world renders logic inadequate and control gives way to contingency.

Algorithmic identity politics reinstate old forms of social segregation—in a digital world, identity politics is pattern discrimination. It is by recognizing patterns in input data that Artificial Intelligence algorithms create bias and practice racial exclusions thereby inscribing power relations into media. How can we filter information out of data without reinserting racist, sexist, and classist beliefs?

Author: Alexander Friedrich

Author: Petra Löffler

Author: Niklas Schrape

Author: Florian Sprenger

Lüneburg: meson press, 2018

<https://doi.org/10.14619/1204>

Ökologien der Erde bestimmen die Gegenwart. Dabei gewinnt die in den 1970er Jahren von James Lovelock gemeinsam mit Lynn Margulis entwickelte Gaia-Theorie heute neue Erklärungskraft. Wenn Gaia bei Bruno Latour sogar zum allgemeinen Modell der Welterklärung im 21. Jahrhundert wird, gilt es, nach der Plausibilität zu fragen, die die Rede von Gaia aktuell entwickelt. Die vier Beiträge des Bandes geben hierauf eine Antwort, indem sie die metaphorologischen und begriffshistorischen Linien der Gaia-Theorie nachzeichnen und ihren Bezug auf zeitgenössische Computersimulationen in den Blick nehmen. So wird der gegenwärtige Ort des Wiederauflebens Gaias deutlich – und damit die Verschränkung von kybernetischen und organizistischen Ökologien mit der Annahme einer Programmierbarkeit von Umgebungen.

Anthropophile Medien durchdringen zunehmend unsere lebensweltliche Realität, sei es im Ambient Assisted Living, als Pflegeassistenzsysteme, in den Arbeitsszenarien einer Industrie 4.0, als behagliche Interfaces des Affective Computing oder als Lifetracker der Quantified-Self-Bewegung. Verbunden ist damit der Einzug menschlicher Befindlichkeiten, Werte und sozialer Routinen in das Design medialer Agencies. Über 40 Jahre nach dem Erscheinen von Michel Foucaults “Surveiller et punir” gerät damit auch dessen Kritikbegriff ins Wanken. An die Stelle von “Überwachen und Strafen” tritt “Unterwachen und Schlafen”. Unterwachen und Schlafen stellt nicht das theoretische Programm einer vollautomatisierten Lebenswelt in Aussicht, sondern das Konstrukt einer nunmehr medialen Umsetzung anthropologischer Grundelemente wie Autonomie, Freiheit oder Vertrauen.

Mit der Digitalisierung geht der Ruf nach freiem Zugang zu wissenschaftlichen Forschungsergebnissen und einer Öffnung des Forschungsprozesses einher. Open Access und Open Science sind die Leitbegriffe dieses Transformationsprozesses, der von den einen euphorisch begrüßt und von den anderen heftig abgelehnt wird. How to intervene? Interventions are in vogue in digital cultures as forms of critique or political actions into public spheres. By engaging in social, political, and economic contexts, interventions attempt to interrupt and change situations—often with artistic means. This volume maps methods of interventions under the specific conditions of the digital. How are interventions shaped by these conditions? And how can they contribute to altering them? In essays and interviews, this book interrogates modes of intervening in and through art, infrastructures, techno-ecological environments, bio-technology, and political protests to highlight their potentials as well as their ambivalences.

Computer simulations are omnipresent media in today's knowledge production. For scientific endeavors such as the detection of gravitational waves and the exploration of subatomic worlds, simulations are essential; however, the epistemic status of computer simulations is rather controversial as they are neither just theory nor just experiment. Therefore, computer simulations have challenged well-established insights and common scientific practices as well as our very understanding of knowledge. This volume contributes to the ongoing discussion on the epistemic position of computer simulations in a variety of physical disciplines, such as quantum optics, quantum mechanics, and computational physics. Originating from an interdisciplinary event, it shows that accounts of contemporary physics can constructively interfere with media theory, philosophy, and the history of science.

Der Zauber der Medien speist sich aus ihrem Geheimnis: Den Usern von heute sind Laptop, Smartphone oder Tablet eine Blackbox, die ihre Sinne im Bann hält und die Techniktricks im Inneren hinter einer opaken Oberfläche verbirgt. Doch solche Verzauberung ist nicht neu. Um ihr auf die Spur zu kommen, nähert sich dieses Buch der Mediengeschichte der Zauberei an der Schwelle zwischen magischem Moment und Ent-Täuschung. Nicht selten folgt einer geradezu übernatürlich wirkenden Zaubervorführung die wissenschaftliche Erklärung und Offenlegung ihrer Tricks. Ein solcher Akt der Entzauberung mag zwar magische Momente als faulen Zauber demaskieren. Er rückt dafür jedoch die Technologien der Täuschung ins Rampenlicht: Erst die Ausnutzung physikalischer Gesetze, das Konstruieren mechanischer Zauberaapparate und das Spiel mit der Wahrnehmung der Zuschauer machen deren ‚Verzauberung‘ möglich. Sie erlaubt, die Frage nach Wissen, dem medialen Zugriff auf unsere Sinne und dem sinnlichen Zugriff auf unsere Welt erneut zu stellen.

### 6.47.1 Citizen Lobby: From Capacity to Influence

Author: Leif Thomas Olsen

Lüneburg: meson press, 2015

<https://doi.org/10.14619/010>

The Internet holds endless opportunities for exchange and dialogue and the promise of developing a better democratic model. Day-to-day politics are largely driven by economic lobbies in the interest of what Habermas calls their „generalised particularism,“ the threat to take jobs and tax revenues elsewhere. Citizens’ influence over politicians is twofold: they are asked for their input in elections, referenda, online consultations and surveys, and citizens can initiate issues where they see political action needed. Yet these “participative forces,” including NGOs,

street rallies and charities, regularly fail to reach the ears of elected politicians as effectively as those of well-funded corporate lobbies. Also, this type of voluntary engagement often falls short of presenting the kind of reasoned challenges to the incumbents—by the electorate—that Habermas’ communicative action aimed at. A more powerful model would therefore organise the efforts of the electorate in a way that both generates those reasoned arguments, which, as Habermas quite correctly pointed out differ from mere opinions, and delivers them to the elected politicians in a manner they can neither refuse nor ignore. This is what the Citizen Lobby intends to do.

Is software dead? Services like Google, Dropbox, Adobe Creative Cloud, or Social Media apps are all-pervasive in our digital media landscape. This marks the (re)emergence of the service paradigm that challenges traditional business and license models as well as modes of media creation and use. The short essays in this edited collection discuss how services shift the notion of software, the cultural technique of programming, conditions of labor as well as the ecology and politics of data and how they influence dispositifs of knowledge.

Wie und wo entsteht kulturwissenschaftliches Wissen? Im Kopf? In der Bibliothek? Am Schreibtisch? Inspiriert von den Laborstudien der Science & Technology Studies ging das Autorinnen-Kollektiv des vorliegenden Buchs diesen Fragen nach. Aufgesucht wurden die persönlichen Schreiborte von Kulturwissenschaftlerinnen verschiedener Disziplinen. In ihren Beiträgen eröffnen die Autor\*innen vielfältige Perspektiven auf bislang kaum erforschte Praktiken kulturwissenschaftlicher Wissensproduktion. Hierdurch wird ein komplexes Zusammenspiel technisch-materieller, praktischer, medialer, sozialer, institutioneller, ökonomischer, politischer und ideeller Dimensionen in den Werkstätten kulturwissenschaftlichen Forschens freigelegt. Die Ergebnisse der interdisziplinär angelegten und kollaborativ erarbeiteten Studien liefern überraschende Einsichten und eröffnen weiterführende Forschungsfragen: ein Plädoyer für eine reflexive, kollaborativ-interdisziplinäre Wissenschaftspraxis.

### 6.49.2 Introduction to a Future Way of Thought: On Marx and Heidegger

Author: Kostas Axelos

Editor: Stuart Elden

Translator: Kenneth Mills

Lüneburg: meson press, 2015

<https://doi.org/10.14619/009>

“Technologists only change the world in various ways in generalized indifference; the point is to think the world and interpret the changes in its unfathomability, to perceive and experience the difference binding being to the nothing.” Anticipating the age of planetary technology Kostas Axelos, a Greek-French philosopher, approaches the technological question in this book, first published in 1966, by connecting the thought of Karl Marx and Martin Heidegger. Marx famously declared that philosophers had only interpreted the world, but the point was to change it. Heidegger on his part stressed that our modern malaise was due to the forgetting of being, for which he thought technological questions were central. Following from his study of Marx as a thinker of technology, and foreseeing debates about globalization, Axelos recognizes that technology now determines the world. Providing an introduction to some of his major themes, including the play of the world, Axelos asks if planetary technology requires a new, a future way of thought which in itself is planetary.

Author: Jean-Hugues Barthélémy

Translator: Barnaby Norman

Lüneburg: meson press, 2015

<https://doi.org/10.14619/015>

The philosophy of Gilbert Simondon has reinvigorated contemporary thinking about biological and technological beings. In this book, Jean-Hugues Barthélémy takes up Simondon's thought and shows how life and technology are connected by a transversal theme: individuation. In the first essay, Barthélémy delivers a contemporary interpretation of Simondon's concept of ontogenesis against the backdrop of biology and cybernetics. In the second essay, he extends his reflections to propose a non-anthropological understanding of technology, and so sets up a confrontation with the work of Martin Heidegger.

The digital turn might as well be marked as an Asian turn. From flash-mobs in Taiwan to feminist mobilisations in India, from hybrid media strategies of Syrian activists to cultural protests in Thailand, we see the emergence of political acts that transform the citizen from being a beneficiary of change to becoming an agent of change. In co-shaping these changes, what the digital shall be used for, and what its consequences will be, are both up for speculation and negotiation. Digital Activism in Asia marks a particular shift where these questions are no longer being refracted through the ICT4D logic, or the West's attempts to save Asia from itself, but shaped by multiplicity, unevenness, and urgencies of digital sites and users in Asia. This reader crowd-sources critical tools, concepts, analyses, and annotations, self-identified by a network of change makers in Asia as important in their own practices within their own contexts.

The early days when digital games were new, harmless, and a niche are long gone. Today's games can simulate battlefields, predict disaster, and crash markets. We are faced with a diversity of play and the ubiquity of games, making them not only a popular medium, but the leading medium of our contemporary society. Based on the keynote lectures held at DiGRA2015, "Diversity of Play" provides a critical view on the current stage of digital games from a theoretic, artistic, and practical perspective by pointing towards the uncanny, the power of "unnatural" narratives, and the exceptions and uncertainties of digital ludic environments. With an interview with Karen Palmer and essays by Astrid Ensslin, Mathias Fuchs, Tanya Krzywinska, and Markus Rautzenberg.

Author: Antonio Caronia

Translator: Robert Booth

Lüneburg: meson press, 2015

<https://doi.org/10.14619/007>

Born on the pages of science fiction comics in the 1920s and 30s, the cyborg lives in popular imagination. As hero of the cyberpunk epic, in its brief but intense history, the cyborg has followed and anticipated the rapport and conflict between man and machine.

In the post-fordist era of digital networked media the cyborg unfolds itself in the dissemination of multiple bodies: on the Internet, in the shift of individual identity, in the new collective aggregation connected by software. It bridges virtuality and concreteness, possibility and necessity. The cyborg thus becomes a field of social conflict, one of the new figures in which the bio-political perspective is embodied.

In 1985, the French philosopher Jean-François Lyotard curated a groundbreaking exhibition called *Les Immatériaux* at the Centre Pompidou in Paris. The exhibition showed how telecommunication technologies were beginning to impact every aspect of life. At the same time, it was a material demonstration of what Lyotard called the post-modern condition. This book features a previously unpublished report by Jean-François Lyotard on the conception of *Les Immatériaux* and its relation to postmodernity. Reviewing the historical significance of the exhibition, his text is accompanied by twelve contemporary meditations. The philosophers, art historians, and artists analyse this important moment in the history of media and theory, and reflect on the new material conditions brought about by digital technologies in the last 30 years.

### **6.50.3 Die verschiedenen Modi der Existenz**

Author: Étienne Souriau

Translator: Thomas Wäckerle

Lüneburg: meson press, 2015

<https://doi.org/10.14619/003>

„Wäre die Philosophie auch nur eine Stunde der Mühe wert, wenn sie uns nicht für das Leben rüstete?“ Gezielten Schrittes entwirft der französische Philosoph Étienne Souriau in diesem dicht gedrängten Buch eine Grammatik der Existenz. Im Fokus steht nicht nur ihre Theorie, sondern auch die tatsächliche Ausübung der „Kunst des Existierens“. Wie Gilles Deleuze und William James vertritt Souriau dabei die These eines existenziellen Pluralismus: Es gibt Phänomene, Dinge, das Virtuelle, fiktionale Wesen – die Existenz ist polyphon. Souriaus radikale Herangehensweise hat auch Bruno Latour und Isabelle Stengers entscheidend beeinflusst. In ihrer ausführlichen Einleitung zu Souriaus Text von 1943 und dem ebenfalls zum ersten Mal in deutscher Sprache veröffentlichten Vortrag „Über den Modus der Existenz des zu vollbringenden Werks“ (1956) zeigt sich eindrucksvoll die Aktualität seines Denkens.

### **6.50.4 Politik der Mikroentscheidungen: Edward Snowden, Netzneutralität und die Architekturen des Internets**

Author: Florian Sprenger

Foreword by: Christopher Kelty

Lüneburg: meson press, 2015

<https://doi.org/10.14619/004>

Ob beim Aufrufen einer Webseite, beim Versenden einer E-Mail oder beim Hochfrequenzhandel an der Börse: Auf ihrem Weg durch die Weiten digitaler Netze durchqueren Bits zahlreiche Knoten, an denen eine Reihe von Mikroentscheidungen getroffen werden. Diese Entscheidungen betreffen den besten Pfad zum Ziel, die Verarbeitungsgeschwindigkeit oder die Priorität zwischen den ankommenden Paketen.

In ihrer vielschichtigen Gestalt bilden solche Mikroentscheidungen eine bislang nur marginal beachtete Dimension von Kontrolle und Überwachung im 21. Jahrhundert. Sie sind sowohl die kleinste Einheit als auch die technische Voraussetzung einer gegenwärtigen Politik digitaler Netzwerke – und des Widerstands gegen sie. Die aktuellen Debatten um Netzneutralität und Edward Snowdens Enthüllung der NSA-Überwachung bilden dabei lediglich die Spitze des Eisbergs. Auf dem Spiel steht nicht weniger als die Zukunft des Internets, wie wir es kennen.

### **6.50.5 The Politics of Micro-Decisions: Edward Snowden, Net Neutrality, and the Architectures of the Internet**

Author: Florian Sprenger

Translator: Valentine A. Pakis

Foreword by: Christopher Kelty

Lüneburg: meson press, 2015

<https://doi.org/10.14619/005>

Be it in the case of opening a website, sending an email, or high-frequency trading, bits and bytes of information have to cross numerous nodes at which micro-decisions are made. These decisions concern the most efficient path through the network, the processing speed, or the priority of incoming data packets.

Despite their multifaceted nature, micro-decisions are a dimension of control and surveillance in the twenty-first century that has received little critical attention. They represent the smallest unit and the technical precondition of a contemporary network politics – and of our potential opposition to it. The current debates regarding net neutrality and Edward Snowden's revelation of NSA surveillance are only the tip of the iceberg. What is at stake is nothing less than the future of the Internet as we know it.

### **6.51.1 In Catastrophic Times: Resisting the Coming Barbarism**

Author: Isabelle Stengers

Lüneburg: meson press, 2015

<https://doi.org/10.14619/016>

There has been an epochal shift: the possibility of a global climate crisis is now upon us. Pollution, the poison of pesticides, the exhaustion of natural resources, falling water tables, growing social inequalities – these are all problems that can no longer be treated separately. The effects of global warming have a cumulative impact, and it is not a matter of a crisis that will “pass” before everything goes back to “normal.”

Our governments are totally incapable of dealing with the situation. Economic warfare obliges them to stick to the goal of irresponsible, even criminal, economic growth, whatever the cost. It is no surprise that people were so struck by the catastrophe in New Orleans. The response of the authorities – to abandon the poor whilst the rich were able to take shelter – is a symbol of the coming barbarism.

Gamification marks a major change to everyday life. It describes the permeation of economic, political, and social contexts by game-elements such as awards, rule structures, and interfaces that are inspired by video games. Sometimes the term is reduced to the implementation of points, badges, and leaderboards as incentives and motivations to be productive. Sometimes it is envisioned as a universal remedy to deeply transform society toward more humane and playful ends. Despite its use by corporations to manage brand communities and personnel, however, gamification is more than just a marketing buzzword. States are beginning to use it as a new tool for governing populations more effectively. It promises to fix what is wrong with reality by making every single one of us fitter, happier, and healthier. Indeed, it seems like all of society is up for being transformed into one massive game.

The contributions in this book offer a candid assessment of the gamification hype. They trace back the historical roots of the phenomenon and explore novel design practices and methods. They critically discuss its social implications and even present artistic tactics for resistance. It is time to rethink gamification!

### 7.0.1 A Portrait of Samuel Hartlib: In Search of Universal Betterment

Author: Charles Webster

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0486>

The 2013 digitization of the vast Hartlib Papers archive highlighted the pressing need for a comprehensive modern study of Samuel Hartlib (1600–1662), a central figure in seventeenth-century intellectual life. Though educated in Eastern Europe, Hartlib spent his adult life in London, where he became a prolific correspondent and chronicler. His Ephemerides, spanning 1634 to 1660, and his extensive correspondence with leading thinkers across Britain and Protestant Europe offer an unparalleled window into the era's religious, political, and scientific ferment.

### 7.0.2 The Intertwined World of the Oral and Written Transmission of Sacred Traditions in the Middle East

Editor: Alba Fedeli

Editor: Geoffrey Khan

Editor: Johan Lundberg

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0498>

In the medieval Middle East, the scriptures of Christianity, Judaism and Islam were transmitted in written and oral form. The means of written transmission and the textualisation of the oral reading of these scriptures exhibit many parallels, which reflect cultural contact and convergence across the various religious communities. This volume is the outcome of a project, funded jointly by the Deutsche Forschungsgemeinschaft and the Arts and Humanities Research Council, that aimed to bring together strands of research related to various aspects of the transmission of these sacred texts in order to reach a deeper understanding of the intertwined world of the three major religions of the Middle East at their formative periods of development during the early Islamic centuries.

### **7.1.3 Hylo Narrans: Echoes of Material Marronage**

Author: Kevin Toksöz Fairbairn

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0476>

This book explores the acoustic agency of brass as a vital medium through which histories of extraction, resistance, and collective creativity resonate. Blending metalwork, experimental instrument-building, and philosophical inquiry, the book listens closely to brass not just as material, but as storyteller—what the author calls hylo narrans, echoing Sylvia Wynter’s invocation of homo narrans. Grounded in their practice spanning artisanal craftsmanship and industrial labor, the author examines how materials respond, resist, and reshape meaning within the workshop, the concert hall, and the broader social fabric. By introducing chimeraacords—hybrid sound objects forged from factory detritus—and their affordance for sonic experimentation, Hylo Narrans challenges Western narratives of purity, utility, and control, inviting readers to consider alternative storylines posed by materials-in-flight.

### **7.1.4 Grammar of Etulo: A Niger-Congo (Idomoid) Language**

Author: Chikelu I. Ezenwafor-Afuecheta

This work provides the first detailed linguistic description of the grammar of Etulo, a language spoken in Nigeria by a minority group in Benue and Taraba states. This description establishes

Etulo as a tone language characterised by a predominant SVO word order, non-inflectional morphology, prominent aspectual values, obligatory complement verbs and verb serialization, among other features. This grammar also serves as a foundation for further description of the Etulo grammar and for the development of pedagogical materials needed in Etulo language teaching.

Author: Will McMorran

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0488>

What does reading fictional violence do to us as readers? To find out, this provocative and original book turns to the works of an author synonymous with sexual violence: the Marquis de Sade. Drawing on psychology, cognitive literary studies, and empirical research, it argues that reading is a fundamentally embodied act – and one that implicates us far more than we might like to think in fictional depictions of violence.

### 7.2.2 Representation Theory: A Categorical Approach

Author: Jan E. Grabowski

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0492>

This volume offers a fresh and modern introduction to one of abstract algebra's key topics. Guiding readers through the transition between structure theory and representation theory, this textbook explores how algebraic objects like groups and rings act as symmetries of other structures. Using the accessible yet powerful language of category theory, the book reimagines standard approaches to topics such as modules and algebras in a way that unlocks modern treatments of more advanced topics such as quiver representations and even representations of Hopf algebras and categories.

### **7.4.2 The Economics of Cultural Loss: Harm and Resilience in North American Indigenous Communities**

Author: Mukesh Eswaran

Foreword by: Ronald L. Trosper

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0477>

Why do North American Indigenous Peoples face such grave conditions in health, poverty, and mortality—including alarmingly high rates of suicide, alcoholism, and drug abuse? In this groundbreaking book, Mukesh Eswaran confronts these urgent questions through the lens of economics, focusing deeply on an underexplored aspect: the erosion of Indigenous culture. While empirical studies have shed some light on Indigenous struggles, Eswaran argues

that mainstream economic theory fails to grasp the unique realities of Indigenous communities. His work introduces innovative models that incorporate cultural and communal values—particularly the sacredness of land and the importance of extended family and communal life—as foundational components of Indigenous well-being.

### **7.8.6 Feeling Colour: Chromatic Embodiment in Film Culture, 1950s–1960s**

Author: Bregt Lameris

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0380>

The shift back from quasi monochrome to coloured motion picture during the 1950s and 1960s famously provided moviegoers the dazzling opportunity to more fully engage their senses, all the while opening new modes of affective possibilities for filmmakers. Set against the intersection of media studies, emotion theory, biology, and digital humanities, *Feeling Colour: Chromatic Embodiment in Film Culture (1950s-1960s)* delves into the role colour played in the oft-fraught relationship between cinema and its audiences. This transnational analysis of an extensive range of midcentury cinematography examines the multilayered effects which extend beyond the silver screen, offering a high-level theoretical elaboration and in-depth historical exploration of both experimental and mainstream movies.

### **7.8.7 Troubled People, Troubled World: Psychotherapy, Ethics and Society**

Author: Michael Briant

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0416>

Therapists endeavour to be non-judgemental and, indeed, are no more qualified to pass judgement on others than anyone else; do they nevertheless learn anything about ethics from their disciplined listening?

The same question was asked after the war about the persecution of the Jews and other minorities, and it's a very live issue again, faced as we are by movements like ISIS, or Putinism in Russia, that cause great suffering in the name of religious or moral regeneration - a bewildering paradox that David Astor, former editor of *The Observer* called 'the scourge'.

Can psychotherapy throw any light on it, or contribute any ideas as to how we might contain, if not prevent, the barbarism it sanctions? Can it offer any insights into a different, more inclusive kind of ethics, and if so, can we glean any guidance from it as to how we might further it?

These are the questions the author explores, drawing on psychoanalytic thinking on these issues for over a century and illustrated by his work with individuals over four decades.

### **7.9.3 Two Early Byzantine Bible Manuscripts in Christian Palestinian Aramaic: Codex Climaci Rescriptus II & XI**

Author: Kim Phillips

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0455>

Despite the ubiquitous use of Greek by the Christian church of the late antique Southern Levant, many Christians in the region also—or only—spoke Aramaic. Today, this dialect, known as Christian Palestinian Aramaic (CPA), is relatively sparsely attested in the form of regional inscriptions and, particularly, in the form of vernacular translations of Greek biblical, liturgical and theological texts. These translations survive predominantly as undertexts within palimpsest manuscripts. Codex Climaci Rescriptus (CCR) is one of the most important palimpsest manuscript sources for the recovery of CPA texts.

### **7.9.4 Phenomenography in the 21st Century: A Methodology for Investigating Human Experience of the World**

Author: Gerlese S. Åkerlind

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0431>

Phenomenography offers a distinctive approach to studying human experience of the world, by highlighting different ways in which the same phenomena (concepts, objects, events) are experienced within any group of people. Phenomenography focuses on the relationship between meaning—people’s holistic understanding of phenomena—and structure, that is the part-whole structure of people’s awareness of phenomena. This structure of awareness then forms the basis for identifying differences in the experienced meaning of phenomena, and how awareness needs to change to allow new meanings to emerge—whether educationally, historically, culturally or socially.

Editor: Janet C.E. Watson

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0409>

Traditional livelihoods and the ecosystems that sustain them are dying out around the world. This book is a collection of research on the relationships between people, their environment, their expertise and their languages along the ecologically fragile coasts of the Arabian Peninsula.

These studies are the outcome of many years of collaborative fieldwork with local communities in three main regions of southern and eastern Arabia: the Musandam Peninsula, Dhofar and al-Mahrah, and the island of Soqatra. Bringing together oral literature, traditional scientific knowledge, and marine subsistence at the peripheries of the Arabian seaboard, the volume makes a major contribution to the documentation of the indigenous Modern South Arabian languages (MSAL), regional Arabic, and the Kumzari language, as well as to a greater understanding of their speakers' mastery in harvesting the seas.

This volume redresses this gap by putting the discipline of world literature into dialogue with scholarship on orature and folklore. It asks, what does world literature look like if we start from orature, from oral texts and utterances, and from the performances and audiences that support it?

### **7.10.7 Being in Shadow and Light: Academics in Post/Conflict Higher Education**

Editor: Dina Zoe Belluigi

Cambridge, UK: Open Book Publishers, 2025

<https://doi.org/10.11647/OBP.0427>

Academia and its citizens, during periods of political violence and social conflict, are often overlooked. When attention is given, the focus tends to be on student activism, access to

higher education, or curriculum development. The experiences of academics affected by conflict remain under-researched, despite the crucial role they play as educators and in generating, documenting, preserving and challenging knowledges. This is particularly concerning given that academics have—and continue to be—at risk as targets of sanction, persecution and oppression.

Author: Justin Smith

Cambridge, UK: Open Book Publishers, 2024

<https://doi.org/10.11647/OBP.0430>

This compelling book offers a unique perspective on D-Day and its aftermath through the personal testimonies of the Wrens who worked for Admiral Sir Bertram Ramsay during Operation Overlord. Drawing on public and private archives, it reveals the untold stories of the women serving in the Women's Royal Naval Service (WRNS), balancing their wartime contributions with the strictures of secrecy and censorship. The narrative is framed by letters from these Wrens, which provide intimate glimpses into both the personal and professional challenges they faced during World War II.

### **7.11.3 Breaking Images: Iconoclastic Analyses of Mathematics and its Education**

Editor: Brian Greer

Editor: David Kollosche

Editor: Ole Skovsmose

Cambridge, UK: Open Book Publishers, 2024

<https://doi.org/10.11647/OBP.0407>

These twenty essays explore questions of mathematics as a topic of philosophy, but also the nature and purpose of mathematics education and the role of mathematics in moulding citizens. It challenges the biases and prejudices inherent within uninformed histories of mathematics, including problems of white supremacy, the denial of cultural difference and the global homogenization of teaching methods. In particular, the book contrasts the effectiveness of mathematics and science in modelling physical phenomena and solving technical problems with its ineffectiveness in modelling social phenomena and solving human problems, and urges us to consider how mathematics might better meet the urgent crises of our age.

### **7.12.1 Knowledge: A Human Interest Story**

Author: Brian Weatherson

Cambridge, UK: Open Book Publishers, 2024

<https://doi.org/10.11647/OBP.0425>

In this book the author argues for a groundbreaking perspective that knowledge is inherently interest-relative. This means that what one knows is influenced not just by belief, evidence, and truth, but crucially by the purposes those beliefs serve. Drawing from classical Nyāya epistemologies, the book asserts that knowledge rationalizes action: if you know something, it is sensible to act on it—and the best way to square this with an anti-sceptical epistemology is to say that knowledge is interest-relative.

### **7.12.2 No Prices No Games!: Four Economic Models**

Author: Michael Richter

Author: Ariel Rubinstein

Cambridge, UK: Open Book Publishers, 2024

<https://doi.org/10.11647/OBP.0438>

While current economic theory focuses on prices and games, this book models economic settings where harmony is established through one of the following societal conventions:

- A power relation according to which stronger agents are able to force weaker ones to do things against their will.
- A norm that categorizes actions as permissible or forbidden.
- A status relation over alternatives which limits each agent's choices.
- Systematic biases in agents' preferences.

These four conventions are analysed using simple and mathematically straightforward models, without any pretensions regarding direct applied usefulness. While we do not advocate for the adoption of any of these conventions specifically – we do advocate that when modelling an economic situation, alternative equilibrium notions should be considered, rather than automatically reaching for the familiar approaches of prices or games.

### **7.12.3 Diachronic Diversity in Classical Biblical Hebrew**

Author: Aaron D. Hornkohl

Cambridge, UK: Open Book Publishers, 2024

<https://doi.org/10.11647/OBP.0433>

According to the standard periodisation of ancient Hebrew, the division of Biblical Hebrew as reflected in the Masoretic tradition is basically dichotomous: pre-exilic Classical Biblical Hebrew (CBH) versus post-Restoration Late Biblical Hebrew (LBH). Within this paradigm, the chronolectal unity of CBH is rarely questioned—this despite the reasonable expectation that the language of a corpus encompassing traditions of various ages and comprising works composed, edited, and transmitted over the course of centuries would show signs of diachronic development. From the perspective of historical evolution, CBH is remarkably homogenous.

Within this apparent uniformity, however, there are indeed signs of historical development, sets of alternant features whose respective concentrations seem to divide CBH into two sub-chronolects. The most conspicuous typological division that emerges is between the CBH of the Pentateuch and that of the relevant Prophets and Writings. The present volume investigates a series of features that distinguish the two ostensible CBH sub-chronolects, weighs alternative explanations for distribution patterns that appear to have chronological significance, and considers broader implications for Hebrew diachrony and periodisation and for the composition of the Torah.

Digital Humanities is a relatively new discipline in the India Rim, and this novelty has created space for innovative research ideas, as well as the use of traditional methodologies and software in different ways within these unique cultural spaces that could potentially influence how Digital Humanities is conceptualised internationally.

### **7.13.1 Insolubles: Critical Edition with English Translation**

Author: Walter Segrave

Editor: Barbara Bartocci

Editor: Stephen Read

Cambridge, UK: Open Book Publishers, 2024

<https://doi.org/10.11647/OBP.0359>

In light of Bradwardine's criticisms, Walter Segrave, writing around 1330, defended so-called restrictivism (*restrictio*) by claiming that such paradoxes exhibited a fallacy of accident. The classic example of this fallacy, the first of Aristotle's fallacies independent of language, is the Hidden Man puzzle: you know Coriscus, Coriscus is the one approaching, but you don't know the one approaching since, e.g., he is wearing a mask. But Aristotle's account is unclear and Segrave, building on ideas of Giles of Rome and Walter Burley, shows how the fallacy turns on an equivocation over the supposition of the middle term or one of the extremes in a syllogism. Thereby, Segrave is able to counter Bradwardine's arguments one by one and defend the restrictivist solution. In this volume, Segrave's text is edited from the three extant manuscripts, is translated into English, and is preceded by a substantial Introduction.

### **7.13.3 Phenomenology and the Philosophy of Technology**

Editor: Bas de Boer

Editor: Jochem Zwier

Cambridge, UK: Open Book Publishers, 2024

<https://doi.org/10.11647/OBP.0421>

Our contemporary world is undeniably intertwined with technology, influencing every aspect of human life. This edited volume delves into why modern philosophical approaches to technology closely align with phenomenology and explores the implications of this relationship. Over the past two decades, scholars have emphasized users' lived experiences and their interactions with technological practices, arguing that technologies gain meaning and shape within specific contexts, actively shaping those contexts in return. This book investigates the phenomenological roots of contemporary philosophy of technology, examining how phenomenology informs analyses of temporality, use, cognition, embodiment, and environmentality. Divided into three sections, the volume begins by exploring the role of phenomenological methods in the philosophy of technology, and further investigates the methodological implications of combining phenomenology with other philosophical schools. The second section examines technology as a phenomenon, debating whether it should be analysed as a whole or through individual artifacts. The final section addresses the practical applications of phenomenological insights in design practices and democratic engagement.

### **7.14.2 The Verb in Classical Hebrew: The Linguistic Reality behind the Consecutive Tenses**

Author: Bo Isaksson

Cambridge, UK: Open Book Publishers, 2024

<https://doi.org/10.11647/OBP.0414>

The consecutive tenses are fundamental in all descriptions of Classical Hebrew grammar. They are even basic to the textbooks on Biblical Hebrew. Being fundamental in the verbal system, and part of any beginner's grammar, they pose a serious problem to a linguistic understanding of the verbal system, since grammars describe an alternation of 'forms' or 'tenses' in double pairs: wayyiqṭol alternates with its 'equivalent' qāṭal, and wə-qāṭal alternates with its 'equivalent' yiqṭol. This 'enigma' in the verbal system is handled in the book by recognising that the alternation of the consecutive tenses with other tenses, in the reality of the text, represents a linking of clauses. The 'consecutive tenses' are clause-types with a natural language connective wa- directly followed by a finite verbal morpheme, a type of clause that expressed continuity in the earliest stage of Semitic. The commonly held assumption that there is a special 'consecutive waw' is unwarranted. The use of the 'consecutive' clause-types in order to express discourse continuity indicates that Classical Hebrew has retained the old unmarked declarative word order of Semitic syntax. Seen in the light of recent research on the Tiberian reading tradition, the 'consecutive' wayyiqṭol can be analysed as a retention of the old Semitic past perfective \*wa-yaqtul, which was pronounced wa-yiqṭol in Classical Hebrew. The 'consecutive'

wə-qāṭal (pronounced wa-qāṭal in the classical language) constitutes the result of an internal Hebrew development into a construction (in the sense of Joan Bybee) already foreshadowed in the earliest Northwest Semitic languages. The book understands the ‘consecutive tenses’ as discourse continuity clauses, which typically form chains of main line clauses. Such chains can be interrupted by other types of clauses. This interruption is a clause linking that receives special attention in the interpretation of the Classical Hebrew verbal system. Chapter six presents a regenerated text linguistics founded on the new terminology.

Author: Karen Attar

Author: Adrian Rice

Author: Christopher Stray

Cambridge, UK: Open Book Publishers, 2024

When Augustus De Morgan died in 1871, he was described as ‘one of the profoundest mathematicians in the United Kingdom’ and even as ‘the greatest of our mathematicians’. But he was far more than just a mathematician. Because much of his voluminous written output on various subjects was scattered throughout journals and encyclopaedias, the breadth of his interests and contributions has been underappreciated by historians. Now, renewed interest in De Morgan’s life and work has coincided with the digitization of his extensive library, revealing the extent to which he pioneered and influenced the development of not merely mathematics but also logic, astronomy, the history of mathematics, education, and bibliography.

Author: Roberto Morales-Harley

Cambridge, UK: Open Book Publishers, 2024

<https://doi.org/10.11647/OBP.0417>

This volume presents a sophisticated and intricate examination of the parallels between Sanskrit and Greco-Roman literature. By means of a philological and literary analysis, Morales-Harley hypothesizes that Greco-Roman literature was known, understood, and recreated in India. Moreover, it is argued that the techniques for adapting epic into theater could have been Greco-Roman influences in India, and that some of the elements adapted within the literary motifs (specifically the motifs of the embassy, the ambush, and the ogre) could have been Greco-Roman borrowings by Sanskrit authors.

### 7.16.1 The Diagrammatics of 'Race': Visualizing Human Relatedness in the History of Physical, Evolutionary, and Genetic Anthropology, ca. 1770-2020

Author: Marianne Sommer

Cambridge, UK: Open Book Publishers, 2024

<https://doi.org/10.11647/OBP.0396>

This is the first book that engages with the history of diagrams in physical, evolutionary, and genetic anthropology. Since their establishment as scientific tools for classification in the eighteenth century, diagrams have been used to determine but also to deny kinship between human groups. In nineteenth-century craniometry, they were omnipresent in attempts to standardize measurements on skulls for hierarchical categorization. In particular the 'human family tree' was central for evolutionary understandings of human diversity, being used on both sides of debates about whether humans constitute different species well into the twentieth century. With recent advances in (ancient) DNA analyses, the tree diagram has become more contested than ever does human relatedness take the shape of a network? Are human individual genomes mosaics made up of different ancestries? Sommer examines the epistemic and political role of these visual representations in the history of 'race' as an anthropological category. How do such diagrams relate to imperial and (post-)colonial practices and ideologies but also to liberal and humanist concerns?

In the Middle Ages half of those who chose the religious life were women, yet historians have overlooked entire generations of educated, feisty, capable and enterprising nuns, condemning them to the dusty silence of the archives. What, though, were their motives for entering a convent and what was their daily routine behind its walls like? How did they think, live and worship, both as individuals and as a community? How did they maintain contact with the families and communities they had left behind? Henrike Lähnemann and Eva Schlotheuber offer readers a vivid insight into the largely unknown lives and work of religious women in the fifteenth and sixteenth centuries.
